The Scalar Wave Laser System is indicated for temporary relief of minor muscle and joint pain, arthritis and muscle spasm, relieving stiffness, promoting relaxation of muscle tissue, and temporarily increasing local blood circulation. The System is not intended to diagnose, treat, cure, mitigate, or prevent disease. If you have a disease or medical condition, consult with your physician or health practitioner before using the Scalar Wave Laser. Use only as directed. Uses for medical indications contrary to the FDA registration are unauthorized and render the warranty null and void. To protect the Scalar Wave Laser System FDA registration, unauthorized claims may result in legal action, including civil claims and loss of opportunity to market the Scalar Wave Laser System. REV 8.29.10

## PAIN & HEALING TESTIMONIALS

I bought my laser on April 18, 2009 when Paul and Lillie did a presentation in Hollywood, Fl. I was delighted with the idea that it would help me with the lack of sleep and muscle pain from my having fibromyalgia. I was diagnosed with this condition several years ago and nothing has worked.

As a woman, I was also motivated by vanity because I heard that it could help you look younger and delay aging. July 4<sup>th</sup> was going to be my 63<sup>rd</sup> birthday, so I decided this was going to be my birthday gift.

I was so excited with all the things the laser was suppose to do for my well being that I wanted to share with my friends and I asked Lillie if they could come to Miami and I would host a Gathering. It was scheduled for May 31<sup>st</sup>.

On the morning of May 17, two week before this event, I was walking toward my car when a SUV, going on reverse, hit me from the back causing me to fall. The SUV then rolled over my left foot.

After an ambulance ride to the hospital and a long day of x-rays, I learned that I had multiple fractures in my left foot. They put my foot in a temporary cast, gave me a prescription for pain relief, a referral to see an orthopedic surgeon, and sent me home.

As soon as I got home I thought that the Scalar Wave Laser may help with the pain. I placed the red probe inside the cast through the front opening. I used it all night and, to my delight, it reduced the pain so much that I didn't even have to take an aspirin. Nothing at all. Every time I started to have pain I ran another session with the Red Probe.

The next day I went to see the orthopedic physician I was referred to. After more x-rays the doctor came to the room with his assistant and said, *"I have news for you, you may have to have not only one surgery but maybe two, and I can not promise you that you will walk again the same way you did before the accident."*

As soon I heard him, I said to myself *"He is not going to see me again, because if he does not trust in himself on the outcome of the surgery he wants to do on me, why should I trust him?"*

After I returned home I scheduled a 2<sup>nd</sup> opinion with one of the best orthopedic surgeons in Florida. After that visit, it was confirmed that, due to multiple fractures, immediate surgery was necessary.

He also asked me what medication I was taking for the pain to which I replied *"nothing, I am using a laser"*. Apparently he did not believe me and gave me another prescription for the pain. I never filled the prescription because I did not need it. I continued using my red probe and laser for the pain. It was working well, I had no pain, and was able to sleep like a baby without any problem.

I was worried because I was the hostess for the first gathering in Miami which was now less than a week away and I was in a wheel chair. No one from the company knew about my accident because I did not want to reschedule the Gathering as so many people in need were looking forward to meeting Paul & Lillie.

In the mean time I was using my laser like crazy, day and night, and there was still no pain. I had no idea at the time that the laser was moving the bones, little by little, back

into alignment.

When I returned to the orthopedic surgeons office for a follow-up, the surgeon and his assistant were viewing the new x-rays and kept asking for the previous x-rays because, they said, *"the bones were much closer than was expected"*.

He looked at me, and said **"I don't know what you are doing, but keep doing it, because you may not need to have the surgery"**. He even wrote in the record about my positive attitude and that I refused to take medication for pain.

After that appointment I returned to my primary physician who requested a NEW set of new x-rays to be sure everything was fine. The result? **They stated that there was no evidence of previous injury in that foot.**

Amazing!!!!!! I CAN WALK AND DANCE THE MERENGUE WITHOUT ANY PROBLEM!!!

THANK YOU PAUL & LILLIE for the Scalar Wave Laser!

**Dr. Hortensia N. Ph.D.**

I had a severe pinched nerve in my neck that radiated intense pain in my right shoulder blade. This reduced the strength in my right arm to about 20% and my entire arm would go numb and my hand would contract (like a charley horse) several times a day.

My doctor told me that the nerves had been damaged and would not regenerate.

I used the laser and the red probe on my neck, with Unwind and Cell Regeneration settings, twice day for about five weeks. The pain was reduced after the first treatment and my arm is back to normal now.

Another amazing experience with the laser was after I took a long barefoot walk on the beach in Hawaii. By the time I returned to my hotel room the hot sidewalks and sand had burned the bottom of my feet, and they had filled up with liquid.

I fully expected to lose the skin after draining the liquid.

I used unwind for about 10 minutes per foot that morning and again that night. The next morning the liquid had completely reabsorbed, but the skin was still loose. I repeated the unwind treatments that morning and night. The next morning the skin had completely reattached to my foot and both blisters healed without the skin dying and having to be removed.

I now have a new Doctor who doesn't write prescriptions for drugs... Dr. Quantumwave!

THANK YOU PAUL & LILLIE FOR THIS AMAZING GIFT TO MANKIND.

**- Kevin J.**

I was medically diagnosed with a torn meniscus in my right knee and surgery was prescribed.

Since using the Quantumwave Laser for three one-hour sessions, I have observed no more symptoms or popping and burning. I continue to use the laser once a week for Four minutes as a touch up. I am no longer limping and I feel more confident since the pain has been gone for over two months.

I love my laser and so appreciate the healing I have received due to its amazing effective healing technology.

**- Harvey P.**

My husband has had ongoing foot infections (off and on) since he was in Desert Storm. With ten days of Quantumwave therapy to his feet, the condition was completely resolved. This was a real "SEE THE DIFFERENCE" change.

I was diagnosed with a multi-nodular goiter and hypothyroidism. My doctor prescribed thyroid replacement so I could get of bed and combat depression and obesity. After using the laser, I now have normal thyroid functions test results, no depression, and much more energy and have enjoyed significant weight loss.

**- Julie R.**

I had an invitation from Joyce T. (a former health clinic client) to listen to a Quantumwave session. Fortunately, after trying it on unwind for 20 minutes on my neck the lump that had been there for 40+ years dissolved.

When I first entered the hotel for the seminar, I could hardly go up the stairs to the event; my left foot and leg hurt. Now, it disappeared. I can now walk up or down the stairs pain free.

I also sleep better, my digestion, and elimination is normal.

I highly recommend the Quantumwave laser from my personal experience.

I have had ten years training and experience with Erchonia and Clarius brand lasers, and can attest to the fact that the Quantumwave laser technology is extremely effective.

**- Hilda W.**

I had some bad tooth pain last week, thought I would need to go have the root canal done. I put the laser on Unwind and the pain has gone away! Also use the laser on Sleep for 4 minutes before bed. WOW!!!

**- Chris A.**

I have had chronic ear aches since childhood. The Quantumwave laser has taken away pain in my mastoid and slowed down the drainage to a manageable level.

My immune system is so much stronger and my sinuses are clear.

**- Kristy**

When I arrived at the presentation last night, I was very uncomfortable from low back and right hip pain. During the evening I ran the UNWIND program and then focused the laser on my right hip.

On the way home, I was aware of some kind of movement of energy in my entire pelvic girdle. By the time I got home, I was feeling very relaxed and in NO PAIN. And I was starving! SLEPT LIKE a baby!

**- Beth W.**

For many years I've dealt with getting in and out of bed with great difficulty and pain. I've been to the chiropractor and orthopedist for help, and only received minimal relief. At that time the pain would come and go in my lower back. I couldn't sit for more than 30 minutes without pain. I also had acupuncture done with little relief and in total, saw six different chiropractors and finally found one I got some relief from.

I had MUA (manipulation under anesthesia) done and it helped. I could then go up steps and sit through a movie and not limp when leaving.

I met Cathy S. and was absolutely amazed when I left with no pain! I saw Cathy several times after that, and ended up buying my own laser in March 2010 prior to my trip to Europe. I was fearful of being in constant pain after sitting so long on the plane and walking around Europe, but now believe that won't be a problem at all. I love my laser and share it with others in pain. THANK YOU PAUL!

**- Robbie W.**

I had hip (back) pain at least once a week. When I visited my friend, she used the Quantumwave laser on me for about 20 minutes.

After the treatment, I stood up, and the pain was gone. I was so surprised! I felt I had definitely experienced some special power.

**- Masaji T.**

My mom has a fractured spine from an 18-wheeler rear-ending her at 85 mph. She had a hip replacement, arthritis and osteoporosis. The laser is capable of totally making her **intense** pain dissipate. The first two weeks, it helped her start walking better by alleviating the pain.

Pain comes and goes but at night she takes the laser to bed, and she wakes up pain-free.

She is hopeful that her bones will heal and her walking becomes easier and permanently free of pain.

She was a major skeptic when she started.

**- Billie P.**

I tried the laser on my foot during the two days I attended seminar. I always had pain in my feet when walking, and couldn't walk barefoot at all. For the first time, I was able to walk around the house barefoot. I don't have any pain in the foot which was constant before. Also, I'm not feeling as stressed. It seems like my body is more relaxed.

**- Lisa T.**

When I was ten years old, I fell on the stairs and hurt my back/tailbone area. Ever since then I have always felt my lower back was locked up, but I had dealt with it for so long I thought it was just bad breeding.

When my lower back loosened and let go, I really felt the new flow of energy affect my body like a small dam breaking and a warm nourishing liquid filling my body.

**- M. M.**

My son Jackson damaged his knee so severely it required surgery. He followed the rehab process faithfully.

His surgeon explained it would never be like before and his pain and limited range of motion would be permanent. He discovered Quantumwave laser and treated his knee for a month. He is now pain free and has complete range of motion.

**- J. Mack S.**

A young client in the first day of her menstrual cycle had pain so bad she had to stay home from school or work. Generally going to bed. We used the laser on unwind on the five main points, then over her ovaries. She went home happy and pain free. Has been back one other time, but feel she is now free of the discomfort.

**- Jeanette S.**

I absolutely love my laser. I have owned it now for 6 months. My health challenges over the past 13 years have been related to auto-immune illnesses...Lupus and RA. Since purchasing the laser I have not only had decreased joint pain involvement, but joints that were unstable from erosion due to years of swelling and disease aggression are getting stronger and becoming more stable. My husband uses the laser as well and was treating a chronic fungal infection on both his great toes. The nail has now begun to grow in normally and the unsightly black discoloration has gone. In the process we noticed that he has begun to grow new hair in the balding spot on the top of his head!

I have shared my laser with my friends and family and they are amazed at how calming the unwind protocol makes them feel. It has help ease pulled muscles, rib pain, etc.

I believe it should be part of everyone's home first aid kit.

**- J. O.**

A few weeks ago I got introduced to the Quantumwave laser in my hometown. During the meeting we got to try the Laser. My lower back is for years (accident at 12) in constant pain.

After the meeting I was for 1 ½ days pain free.

I'm looking forward to more pain free days after purchasing a laser.

**- Martha C.**

We have a lady in Manitoba that burnt herself so badly, she was scheduled for skin grafts and extreme reconstructive surgery. After 2 weeks of 3 hours/day she is back to her job as a music teacher, and the doctors are completely dumbfounded and amazed. Her hands were burnt to the bone and 2 weeks later, you can hardly tell aside from some pink skin.

**- Jalquoi A.**

I am 15 years old, and for the past two years, I have gradually developed kyphosis. About two weeks ago, I visited a specialist for my back, and they informed me that there was a very slim chance that my condition would improve. They fitted me for a brace (which I did not like) and I began to believe I would live in pain forever.

A week ago my friend told me about the laser, and thought it might help me. I was a little skeptical at first, but agreed to abandon the brace idea and come this weekend to see what it was all about.

I have to say, that after last night, my back has definitely improved and most of my pain is subsiding. This laser is amazing! I hope my parents come home with one.

**- Dorian P.**

About a year ago I was having problems with my lower back and legs, caused by a narrowing of the spinal canal. Affecting the L4&5 spinal vertebrae, causing the nerves specifically the sciatic nerve, to be pinched, causing at times various levels pain and disability in my legs and lower back. I was prescribed several medications ranging from morphine, codeine, and many other pharmaceuticals to little success.

I was introduced to the Quantumwave Laser, in October 2009. Since then I have been able to eliminate the need for these pharmaceuticals.

The Quantumwave Laser has reduced my discomfort; I have a greater range of motion, greater physical peace, and the ability for better rest, to a better way of life.

Thank-you Paul & Lillie. Continued success on future products.

**- Peter & Bambi**

I did the laser on cell regeneration on my knee cap as I had injured it, and my knee has stopped clicking and I have no pain now.

**- Stan F.**

I was recently in a horse riding incident where my shoulder muscles suffered severe strain. I felt like I had been in a car accident. I am new to the laser so with skepticism I tried using it on my sore shoulders. The next morning I woke up completely pain free. I am no longer a skeptic.

**- Lynne B.**

I like to sit with my feet under me, but it causes severe pain in my knee. I grabbed the Scalar Wave and used the rejuv and sooth program for 12 minutes each. The pain left and did not come back for nearly 4 months. I now use it on a more regular basis just to keep the pain away.

**Shirley R.**

The second time I was exposed to the laser I had a wonderful result with hip pain that I had in my right hip for over three years. It felt great to finally be free of this pain, as it had affected my sleep, my endurance, my mood, and my overall well-being.

I continue to use the laser for my family and myself, and also in my practice.

One of the things I really like about this laser is the transportability. I throw it in my purse like a cell phone, and use it and share it wherever I go.

I did a 60 mile walk with 150 other women this summer-I carried my laser with me and used it all along the way. I credit the laser for my being able to finish the walk in a healthier state than I would have without it.

**- Dianne P.**

My husband and I were under incredible stress. I had also been told I had a fast growing tumor in my ovary and the bones of my mouth were all dying from "cavitations" (I had had extensive dental and orthodontic work done). I was a mess!

In May I purchased the laser and red probe. We used it every day and often were impatiently waiting for the other to finish so we could both have our turn on it. My husband and I got through our ordeal and brought closure to the situation. We not only managed our bodily pain during that time, but we both improved. Chronic pain is no longer a part of our daily lives. I continue to "zap" my jawbones. There have been no symptoms from my ovary for months. I am going for my annual medical exam at the end of the month. I expect a clean bill of health.

I have a friend who tried the laser while visiting us. He had an old sports injury that had caused him pain daily for 20 years. After about 1 hour on the laser he has been pain free. (that was in August)

**- Barbara F.**

I have a friend who introduced me to the laser in the summer of '09 following a knee injury. It was an emotional time in which I could not work or garden and basically get on with my life.

The laser treatments helped me to relax into a place where I could leave my stress and go to a place of healing. Physically the pain in my knee was erased and I know that prior to the laser I would have perhaps had to endure surgery.

**- Bev F.**

My mother is 72 years old, and has numerous health challenges. She's had a quarter of her right lobe removed from her lung, which also required Chemotherapy and

radiation. Through numerous tests it was also discovered she has an aortic aneurysm (5.1cm). She then had to go back for radiation as some of her lymph nodes became cancerous. Due to all of this, she frequently suffers from generalized pain, swelling in her ankles and arms. Lately, neuralgia has set in her right TMJ (jaw). It is excruciatingly painful. When I first started using the laser in October, after going to a number of presentations I've been encouraged to use unwind and quantum on her. After 4-5 treatments, the pain in my mother's jaw has reduced remarkably. I might also add, that my relationship with my Mom, which can be difficult, has also improved. To see my mother opening up and trusting the process is a gift which I feel the Quantum frequency has been a catalyst for.

**- Lynne P.**

Last March (09) I fell into my cupboard and gashed the top of my head 10 inches. I required 25 stitches and was gashed to the skull.

After several months of healing my scar begin pulling. I set my laser on unwind and placed it on different parts of the 10" scar or wherever I felt it pull. The pulling disappeared. The next day it came back so I repeated the process and the pull disappeared. Next I went to the scar mode and placed it on the scar area. The pull disappeared for 5 days. I repeated the process on scar mode and the pull has disappeared completely. Yeah!

**- Betty-Lou S.**

I am ever so pleased that my friend invited me to experience the Quantumwave Laser. After two short sessions my sciatica is almost pain free and my foot has stopped "burning." Thank you so much.

**- Sherry M.**

I came to the seminar, with a sinus headache. While using laser on unwind, my sinuses started to drain, and forehead of pain decreased.

**- Sharon K.**

My niece's partner complains of neck pain, and has been suffering from this for a long time. He didn't believe in alternative methods, and thought they were "rubbish" He tried the laser, and the pain was gone. His pain hasn't returned, and it's been two month. Now he believes.

**- Helen S.**

While caring for my beautiful mother in the last months of her life, I developed a heel spur. I suffered with this terribly painful condition for 5 long months. Shortly after receiving my laser in November '09, it took only 3 sessions on "Unwind" directly on the heel area and the condition has totally disappeared!

I also had a large almost "golf-ball" sized fat cell that protruded from my left side. After each session I would run the "Fat Cells" program over it and it has almost completely melted away!

My experience with the laser continues to be a journey towards rejuvenation and regeneration that has me very excited! The Quantumwave Laser is an empowering tool that allows the body to "unwind," delete stress, receive energy for repair and to reach the blissful state of "Still Point."

"Let There Be Light"

**- Cindy R.**

My name is Martin and I have been involved with "energy medicine" for many years. I have had the pleasure of giving and sharing my gifts with those people who are open to another method to assist their bodies natural healing rather than relying only on mainstream medicine. There is a great need for both!

In June 2009, I had surgery on my left knee for torn meniscus ligaments and arthritis damage. It really hurt BEFORE the surgery! After the surgery it only seemed to get WORSE. I have a demanding job, and walk a lot throughout the day. As more time passed, things did not improve! To get through the day or to sleep at night, it was common for me to take 21 milligrams of melatonin AND 100-150 milligrams of Demerol for the pain.

In Jan. 2010, my wife and I attended a presentation on Lasers in Regina, Sask. A friend of ours had invited us, and I said to myself "Ya, ok" we will go. Good Decision! The day of the presentation, I had taken nothing for the pain, and during the session my left knee started to hurt. The pain level went from a 7 to a 12. Then it really started hurting to the point where the knee went completely numb. It hurt so bad, I had tears in my eyes and almost wanted to cut it off. Yes really that did go thru my mind.

One of the organizers of the session let me use one of the demo lasers. After approximately 10-15 minutes, the pain level went down to an eight! (I was willing to keep the leg at that point)

I had an opportunity to have a One hour treatment session with another friend. Going into that session I was at 7-8 pain level. Upon leaving the session the level of pain was approximately four.

In Feb. 2010, Gisele and I attended a session with Paul at the Regina Inn, and I used the laser and probes for a long period of time. Going into the weekend, my pain level was at 7-8. After using and working with them, the pain level went to a two!

By using the lasers, my "stress" level from the pain, etc. has dropped a lot. My wife has noticed a HUGE difference in me. There is more I could share about my knee and the lasers, but enough is enough!

Try the lasers. The only thing you may lose is the pain!!!

**- Martin C.**

I have had a problem with my hip for about three years. Massage therapists, chiros could not pinpoint where the pain was.

I purchased the laser in November, and after using it for a few weeks, I do not have the pain anymore.

**- Helen P.**

My mother-in-law has a frozen shoulder as well as major arthritis. She has not really been able to use her arm.

After her first session she felt pain free and was actually able to use her arm to help pull herself out of bed the next morning.

- **George C.**

I'm facing back surgery. Had laser treatment, decreased pain level by 70%. Bought a laser and plan to decrease the pain even more.

- **Kathryn H.**

Since using the laser my back pain, getting up 1 to 4 times per night to urinate, taking medicine to stop sinus headaches, migraines, and taking pain medicine to treat my **fibromyalgia** has completely stopped. The laser is the only thing that has helped me to do this in only 1 month. I am working on other things and am very confident the laser will also help me to do this. Thank you for this healing machine!

- **Corey P.**

Ever since I have started using the laser I have not had to take any pain relievers such as Motrin, Advil or even Tylenol. This is amazing since I could not sleep without taking something before bed.

- **Joan M.**

My name is Laurie and I purchase my laser at the end of Nov. 09. I made the decision to purchase my laser after seeing a dramatic change in my brother. He drives truck for a living and came home with his back all jammed. He had one session which lasted approximately 1.5 hours. Upon getting off the table, I saw that his color had change completely. I could see in the days after that session that not only was the pain reduced by 90%, his whole personality changed. He was happier and calmer.

- **Laurie S.**

I am blessed with Chemical Intolerance. It is extreme and life threatening at times. In early April my left foot had a sudden burning pain up to my ankle. The pain was intense, tears were shed. The SCIO told me it was chemical, and gave the name of the chemical. Upon researching it, we found it was an herbicide that the courtyard had been sprayed with that day, and had unknowingly walked through it. The SCIO brought the pain from a 15 to a 10, Frankincense gave me temporary relief. At my 1<sup>st</sup> Quantumwave Laser event, I found the setting called "Detox" and placed the unit over the pain on my foot. After two (4) minute rounds, the pain dropped to 5 and then Paul told me about the Ozone setting! NOW NO PAIN AT ALL!

My son-in-law had a bad infected wound on his thumb. He had done 2 rounds of antibiotics by the time I got to him. Dr. was putting fear of MRSA into his head. 3

minutes w/ Scaler Wave and Red probe on Pleo stopped pain reduced swelling. Next day wound was 90% healed.

I almost forgot, my melanoma is shrinking and has stopped "Buzzing" I annoy my Doc because I refuse treatments but she is amazed at my progress. She was my third sale and I have promised her not to die before my time!

**- Kristy M.**

I was in an automobile accident a few months ago and was prescribed medication for the inflammation and pain by a doctor. Of course, the medication gave me very bad side-effects and was not effective. A friend loaned me her scaler wave laser for 2 days and I had such wonderful relief, that I had to order my own laser. I have used my laser everyday since I have received it, and I truly love my laser! Everyone should own one!

**- Victoria M.**

A 78 year old friend of mine hurt her foot about 21 years ago. When it happened, her right foot ended up twisted backwards under her leg. This caused a major leg and groin injury as well.

She was not able to feel her foot properly. It was numb and felt "leathery."

After using the Quantum Wave Laser on her foot and the red probe on her leg, she experienced amazing pain relief. She exclaimed that she was going to tell everyone about the Quantum Wave Laser!

Two weeks after I bought the laser I tore the meniscus in my knee and was in extreme pain and could not bend or put pressure on my knee.

I used the laser on my knee every day on the Unwind protocol. I also used Ligament, Muscle, Relieve, Soothe, Endorphins, and the Spleen meridian. Within four days, my knee felt 85% better, and in one week, 90% better! After two weeks, the pain was 99% gone, and no longer required pain medication or surgery. I was amazed! Wow!

**- Jane S.**

When she left, she was able to walk normally, without limping, and without any pain! She was very happy!

**- Dr. Gail S.**

I was diagnosed with a hernia through an ultrasound. Luckily I had been introduced to the Scaler laser and had approx. 12 or 13 treatments on the area. The surgeon wanted to do a second ultrasound to confirm the place of the hernia. This was two months later and it was inconclusive, they could not see the hernia opening. I continue to do treatments to completely heal the area.

**- Patti L.**

I was preparing dinner and I needed a cookie sheet. My son placed it on my gas stove, beside the pot of water I was boiling.

After a time I picked up the cooked sheet and by the time I got it over to the cupboard to drop it, I had a bad burn.

I immediately put my hand under water. I was wondering what to do. I knew I couldn't drive my vehicle with a stick shift. I thought about my laser. I put it on for close to 1 ½ hours on Pleo, Relieve, Activate, and cell regeneration. Before going to bed I had NO pain and a slight scar.

The next day after rewinding, I did the same settings as the previous night plus scar. I went for a run came back looked at my hand—No scar and NO pain.

**- Diane R.**

I was in the Saskatoon meeting for the first Quantum introduction. I had tried the basic laser on knees that evening during the meeting. I had pain free knees for nearly two weeks. I had attending the Regina meeting Feb 5-7 and purchased our first laser and probe.

**- Brian M.**

Ten days ago I injured my lower back, pushing a car in a snow storm. I continually two times daily used my laser on the unwind-adrenals, sacrum and occipital and thymus.

My back pain has disappeared.

**- Barbara C.**

I made a last minute decision to attend the Quantum Laser Seminar in Regina on Friday Feb 5, 2010. Along the way, driving from Winnipeg to Regina, I almost felt like turning back because everything from top to toe was acting up. My injured shoulder ached; my lower back was so sore I could barely sit in my seat. I was tired and one of the molars in my mouth just started to throb for no reason.

I used the laser on every possible part of my body that evening, including my adrenals, sacrum, back of the head, and thymus as directed. By the end of the evening I was feeling renewed, refreshed and significantly relieved of much of my distress. I wasn't totally pain free, but I was on the right path. Even the tooth settled down so that I could sleep that night. Cranky and miserable renewed into happy and content.

**- Debra B.**

I used the Quantum laser all day yesterday on my elbow which gives me pain when turning a doorknob or carrying things, moving in different situations- I must admit it does feel very relieved today and is not as sore and inflamed as before using the laser. I also used it to open up adrenals and other glands. I slept better last night to my disbelief!

**- Shari S.**

I have had numerous broken bones and initially bought the laser to use on my clients but it makes such a difference in my own feet that I use it daily on myself and am officially pain free! Unwind and Quantum directly on my feet for 4 min each and I feel immediate relief.

**- Jacqui A.**

Immediately upon putting the laser on my back I felt a sense of calmness. I wanted to try it on my lungs because I have had some serious scar tissues that tend to bleed when they are irritated. I normally cough from the moment I get up in the morning throughout the night and all day. When I slept that night for the first time in years I felt like I could breathe a bit easier and slept throughout the night without coughing. This is definitely the protocol that I have been searching for. Thank-you.

**- Gisele C.**

What an incredible quantum tool for self-empowered healing!! Thank you so much Paul and Lillie. I have had nothing miraculous results with all my clients, family and friends with the Quantumwave Laser.

I am most impressed with how my 14 year old son had ripped a large chunk of skin from the inside of his palm and instead of asking me to nurse it for him, he went straight to my laser bag and proceeded to treat himself with three programs of four minutes each. He "then" came to show me how the bleeding had stopped and how the first layer of skin had formed over the wound. Wow, the Quantumwave Laser provides an opportunity for a new generation to have a tool to be self-empowered in their own healing process.

**- Monica N.**

After by-pass surgery my husband was on a trach. When the trach was removed, he was unable to swallow. The speech therapist said that 5% of the people who have a trach never regain their ability to swallow and she felt that he was one of the 5%. I called a friend, and asked what we should do? He suggested Unwind, Quantum then do Ligaments and Muscle on both sides of his throat. I did, and he swallowed the next day. I continued the treatment every day for one week. His throat was x-rayed and the technician said, "this is impossible, it's like a miracle, I am looking at a new throat." After one week, all the cells in the throat had completely regenerated.

**- Kathryn F.**

I used the laser for four minutes on each side of the head of a friend of mine who had migraine headaches since 1994. He also had a brain tumor taken out in 1996. I saw him a month or so later, and he informed me that he has had NO HEADACHES since the laser treatment.

**- Nancy L.**

A woman came to see me with severe pain and physical limitation. She is on disability from a career of journalism, has been unable to write, use the computer or travel for several years.

After a one hour session using Neurons, Unwind, Pleo and Ozone, she was able to move her "frozen shoulder" for the first time in years. Her pain has improved from 8 out of 10 to a two. She has not used any pain medication since, and is now full of life after two weeks.

**- Valentina K.**

A young man age 32 is sent to emergency three times. He had chest pains, high blood pressure. He was in fear of having a heart attack. I used the laser on him, on unwind and quantum, and miracle. He was due to go in the hospital two days later to get stents put in his heart. When he met with his doctor two days later, it was determined by the doctor that he did not need any medical procedures.

**- Eht-EI T.**

We received our laser and red probe last Monday. Upon sharing some info about scalar wave energy and waiting while my slow boil Swedish husband to consider it and purchase it for us we studied more and learned to use unwind, quantum, and all essential settings.

Although a skeptic after a 1.5 hr treatment as stated above, my husband had pain relief and more energy directly. He is now a convert and ambassador.

**- Lief & Michelle J.**

Reconstructive Foot/Toe Surgery = Healing occurring 3x faster!

This is second such surgery I have undergone-exact surgery same.

Stitches grew over before being taken out because medical system has a schedule 1 stitches should have been taken out in 1/3<sup>rd</sup> the time.

After two months of repeated and daily use, I have healing akin to 6 months on the last same surgery. (I now have limited swelling and pain and have mobility and range similar to a much longer healing time.

**- Vannette K.**

I recently experienced a sensational session of [Quantumwave laser] with Harvey Pearlman.

My inquiry was caused by foolishly moving a 25" TV (old style) out to the trash this included my back and shortly after my left knee.

In twisting the knee it caused a bone to displace- Harvey had his laser a few days, we decided to try said laser on my knee and we were sitting talking (about 2 minutes) when we heard a pop and my leg went up in the air- (a couple of inches) we both

looked at each other in surprise- (at that time I had been sporting around a knee brace) we removed the brace and to our surprise my knee had no pain at that time!

**- Helen J. R.**

I purchased the laser in Oct of 2009. It is changing my field. I have been unwinding and no matter how crazy my life is I have an inner calmness or stillpoint as Paul calls it. I feel as though I am observing the madness around me and I take it in and end up laughing about it for it doesn't serve me anymore so I just unwind and go for a walk on the beach and expand. The laser has also helped me with my teeth I have a root canal is left front tooth and a cracked molar it takes away the throbbing and clears the bacteria. Life is a challenge and the laser has allowed everything to flow better for my nervous system and me is so much calmer and I can feel my field shifting and it's a blessing. Namaste

**- Heather H.**

When I tried the scalar wave laser for an extended period of time, I began to see noticeable results.

I had a "stuck" sacrum that I could not get unstuck with any of my modalities. Wanting to avoid a chiropractic appointment, I used the laser for nearly two hours and by the next day, the sacrum felt perfect and 2 months later, it has remained clear and free from pain.

At a different point in time, I have had horrendous headache and wasn't sure I would get through the day. I had the opportunity to put one laser on each side of my neck for two hours. My headache was gone and my neck felt incredibly free.

**- Annette M.**

My son fell on his elbow. The Doctor's exam lead us to believe that surgery would be needed. The QWL w/ ultra violet probe took 30 seconds to stop pain. Another two minutes apparently inspired his body to heal the injured nerve. He no longer complains about it.

**- Kristy Moore H.**

The first night after buying the laser my phone ringing and a patient was crying with a headache like none she had ever had-as she talked I put her in my mind in front of me. As she continued to talk, I heard her voice start to change after about 25 min. I ask about the headache, and she said it was "Gone." I then I explained to her what I was doing and about the laser. She was my first sell.

**- JoAnn W.**

One night something went very wrong with my knee and really I could barely walk— forget about just limping. I went to bed, did the general protocol and then went to the

worse area on the knee-unwind, quantum, pleo and relieve. Went to sleep and no problem walking when I awoke.

**Zoi H.**

I performed a liposculpture recently using the laser before and after the procedure. Usually following the procedure patient would be very sore, inflamed and tender. It would usually take up to two months of lymphatic drainage to experience some comfort. With the laser I was convinced I had a tool that could improve the outcome 48 hr after the surgery.

My patient used the laser inside the infra red cabine. She had 2 other sessions before I saw her again. On the 7<sup>th</sup> day post surgery the result I got was equivalent to 2 months of lymphatic drainage. Patient had absolutely no pain in the 7<sup>th</sup> day, to the point that 3 family members scheduled for surgery with me.

**- Jean-Mario P. MD**

My niece has several case of fibromyalgia. I took a week off work and went home to treat her. After 1 basic unwind the first night. The next day she took off her pain patch and was able to do thing she had not done in a while. She is continuing to improve every week and learning.

**- Karen S.**

Fooling around with my son I fell and tore my right knee ACL and meniscus. Literally I felt like my knee was hanging off my upper thigh many Dr's and people said you would never be able to run or walk far distance w/o surgery, my colleague began to laser me and I continued and eventually bought one. I used the Unwind on my knee and adrenals . I never had to have surgery, and now walk and run. I am so grateful for the laser. Thank you

**- Sandra C.**

I broke my back, squished two vertebrae when I was thrown from a horse when I was 14. I have suffered great stiffness recently (50 years later). The laser has helped me greatly release tension in my lower back and I feel as if I can walk with more freedom, flexibility and pain free—the stiffness is almost gone—now I'm dealing with emotional feelings that were stored in my back. I am looking forward to complete healing.

**- Barbara G.**

A patient who had two prior back surgeries still has intractable back pain. An implanted electric stimulator in the spinal canal gave her no relief. She had a morphine pump injected and still continued to use large amounts of pain medication.

After 5 laser treatments she reduced her medication intake in half. Also prior to the laser treatments she was essentially home bound and following the laser Rx was able to go to the grocery store & do some shopping.

**- Leonard K.**

I have two experiences

I have pain at lower back by twisting muscle. My friend did the cold laser about 20 minutes pain was gone.

I fell from tree several feet high. I got the pain at my hip. I tried cold laser about 20 minutes twice. Pain was gone

**- Masaji T.**

One day my husband got a phlebitis (severe) condition. Swollen leg-fever-redness and a vein very congested and ready to explode. I used the laser and in three days was completely no pain. Great!

**- Lucy M. PhD**

Using the laser on unwind for one week brought my husband out of a coma. Treator Muscle and Ligament on the throat and he regained his ability to swallow in one day. Repeated each day for one week and his throat cells completely regenerated as confirmed by x-ray.

**- Kathy F.**

My dentist was about to go in for shoulder surgery within two weeks. He is a cosmetic dentist on Park Avenue in NYC after one treatment he felt some relief. Since he was my dentist and was having trouble holding the dental tools, I lent him my laser for one week between appointments. I told him to use it three times a day for about 45 minutes each time after the week was finished, he canceled his surgery.

**- Joan C.**

After spending five days at a touchy feely camp in rural CA, I expected to spend three pleasant days as a tourist in San Francisco. Almost immediately upon checking into my hotel, I knew that I was about to be desperately ill. I'm guessing that I shared a lot of close contact with a number of very sick people.

I was in bed for three solid days with the Quantumwave Laser, barely eating anything. I knew at the onset that this was going to be very serious.

Had I not had the laser with me, I knew I would have been in the hospital. Instead, I was able to drive to Los Angeles to be at another five day event.

I continued to use the laser and loaned it to a person who had a migraine. In three hours she was on the brink of being pain-free. Another person had some back pain. In two hours, she found significant relief. I returned home as a healthy, fully functioning person.

**- Jennifer L.**

I was diagnosed with a hernia through an ultrasound. Luckily I had been introduced to the Scalar laser and had approx. 12 or 13 treatments on the area. The surgeon wanted to do a 2<sup>nd</sup> ultrasound to confirm the place of the hernia. This was two months later and it was inconclusive, they could not see the hernia opening. I continue to do treatments to completely heal the area.

**- Patti L.**

Six years ago, on August 16, 2003, I went to my doctor to get a routine checkup. The doctor proclaimed that I was "among the healthiest men he knew." That night I had a hemorrhagic stroke. With it went my engineering career, my ability to dance, water-ski, snow-ski, ability to do all the other things that require a functional right side of the body....like writing, eating, shaking hands, etc. Therapy followed with fair results, though lacking the results expected.

On Jan.1, 2006 a TIA imposed itself on me, affecting my left side with numbness in the left hand and foot. It also noticeably affected my speech. In reality, the TIA tore down much of the benefits achieved from previous therapies. However, I kept a positive attitude, hoping there is something, somewhere that could restore my capabilities.

On Oct. 25, 2009, through a good friend, Georgette, I received an invitation to a demonstration featuring a Quantumwave Laser. I was told its successes in Europe, over the last 20 years, have been astounding. A charming professional, Cathy, aptly conducted the demo and afforded the attendees some actual hands-on-time.

By the end of the demo, I saw there would be help to eliminate my unyielding impairments! I was told this hand held device interacted with the body by rejuvenating and purifying the cell structure, preparing the untainted cells for new growth.

Hearing and seeing what this laser has done for others, was truly a triple "hallelujah" day for me! I reasoned that if I could possess one of these lasers, I would become a fully functional person again!

After attending a second demo session, I was offered the opportunity by Cathy, to use a Quantum Wave Laser, in my home, for a two-day period to test its effect on my stroke-related impairments. I was elated with this generous gesture. I had little knowledge about the 110 specific protocols in this laser, and had no instruction manual. None-the-less, I decided to make the most of this opportunity. I started with what I thought I knew, and in 14 hours, using only the "unwinding" protocol to do my testing, the Quantum Wave Laser made significant improvements in all my impairments as indicated below.

Test Results:

1. Release of stiff, locked neck - By applying the laser for 1.5 hours, to the base of the skull, on the right and left side of my neck, I was able to change my head rotation angle from a total 120 degrees to 190 degrees without pain.
2. Numbness in the face - with a treatment of 1.5 hours, the numbness was reduced from very noticeable to barely noticeable. Loss of numbness improved my speech.
3. Right Shoulder Mobility - before treatment, I could only raise my hand to the level of a couple inches above the top of my head, without pain. After treatment, I

could raise my hand 18 inches above my head without pain. Treatment time was 1.5 hours.

4. Releasing "Catch" (jerking motion) in Right Knee. Applying the laser under and over the knee for 1.0 hours eliminated the "catch," smoothing my stride.
5. Right Ankle Stiffness - Placing the laser under my foot, served the body's chakra ending at the bottom of the foot. From that location it seemed likely, there should be help through the Chakra, to other body parts served by the Chakra. Due to the proximity of the laser to the ankle, I reasoned that the ankle would be served with the laser's power. Within 1.0 hour, treatment the stiffness subsided.
6. Balance for walking - Balance is a brain function, application of the Laser for 2.0 hours, to the head (front, side, back) improved my balance remarkably. I was able to pick up my feet, placing them down smoothly, heel first, without stubbing my toe.
7. Numbness in right hand - Fingers of the right hand have remained tensed and rather inflexible. Laser application for 2.0 hours removed most of the stiffness and numbness (in the hand), allowing the finger joints to be flexed with greater ease.
8. Pain in left wrist - Because the left hand is used as the primary implement to do everything, it became painful, to a degree that I could hardly pick up a cup of coffee. Using the laser for 2.0 hours eliminated most of the pain.
9. Bladder control - Prior laser application for 1.5 hours, bathroom trips were four to six times a night. After application, nothing seemed to change until 4 or 5 days later. Then the bathroom trips diminished to one or two times, and has remained constant to date.
10. Kidney, Liver, Spleen, Thymus, and other Like Glands—received the remainder of the laser operation time, about 1.0 hour.

#### Observations, Recommendations, and Comments

With time, some of the impairments have regressed somewhat. Regression appeared in varying degrees, but never returning to pretest severity. All impairments held some level of improvement.

It is with complete confidence and sincerity; I make this statement: "The Quantum Scalar Wave Laser is the only device, currently used, that will be found capable of reducing to an unnoticeable level, every impairment that a stroke victim may incur." If properly used, with training and commitment, this laser will return a stroke victim to society as a completely functional individual.

It is my belief and suggestion that every rehab center own Quantum Scalar Wave Lasers as part of their patient's therapy. The use of the laser is so safe and simple that it could be patient applied, under the supervision of a (laser certified) physical therapist, who will set up the laser for maximum effectively.

Further, I recommend that Medicare and secondary insurance companies be contacted by Quantum Wave laser people about the history of rehabilitation successes around the world and establish a patient ownership process and price. If Medicare and the supplemental insurance can come together to provide a motorized-scooter or wheel-chair for a patient's convenience, to get around in their own house, why not give them a device that will allow them to **walk** around in their own house or anywhere else they want to **walk**? Would that not make more sense, that tying them to a scooter or wheelchair?

I learned that the liver and kidneys control the well-being of all the organs in the body. While conducting tests I did not know that fact. I went with what I knew. I did not know enough to take advantage of the correct protocols programmed into the laser, yet I received great results. What a victory for me!! I see a rejuvenated fully functional person, in me, resulting from future applications of this laser.

- **Frank K.**

I chose these clients because measurable results were seen with one Laser session.

For the following clients, I initially used the Unwind setting on the Adrenals, Sacrum, Occipit, and the Quantum setting on the Thymus before addressing their individual issues. All initial and subsequent programs were run for four minutes.

### **Venous Ulcer—Lower Leg—Chronic for 22 years post blood clot in area**

35 year old male Real Estate Agent

Programs: One extra Sacral Unwind

Over Venous Ulcer: Scar, Regeneration, Lymph, Capillaries, and Cellular Regeneration

After 1 session the skin started to heal and thicken noticeably within two weeks.

### **Groin Injury—Nagging injury for 18 months**

31 year old male Professional Hockey Referee

Programs: One extra Sacral Unwind, One Quantum over Sacral

Over groin: Relieve, Muscle, Scar, Fascia, Ozone, Cellular Regeneration

After one session, I refereed hockey four days later with no discomfort. Refereed another hockey game the next day with no discomfort where upon he would have had pain and weakness in the affected leg.

### **Achilles Surgery Repair—two weeks post cast removal**

49 year old male Senior Racquetball Champion

Programs: Over Achilles: Relieve, Cellular Regeneration, Lymph, Scar, Capillaries, Ozone

After one session, the swelling at the surgical site went from a golf ball diameter to negligible in size. He could walk down a flight of stairs normally whereas before he had to walk down the stairs with a side step.

### **Fibromyalgia—Chronic**

58 year old female Day Care Provider

Programs: filtered thru Thymus: Relieve, Pleo, Liver, Kidneys, Lymph, Relaxation, Muscles, Well being, Ozone

After one session was able to sleep better, had more energy, less pain. This level of wellness continued for two weeks where upon we performed another similar session. After the second session, again she received and increased level of wellness in all areas, which she has continued to maintain eight weeks later.

### **Shoulder Blade area—pain with no pathology for about five years**

39 year old female office worker

Programs: One extra Occipital Unwind

Over shoulder blade area: Relieve, Muscle, Ozone, Scar, Cellular Regeneration, Quantum due to possible emotional connection.

After one session she had complete pain relief and could shoulder check when driving whereas before she had limited cervical movement.

As a second benefit, this client also had a congested chest (Unknown to me) due to eating cheese that day and being lactose intolerant. After the session she stated that the mucous had totally cleared out of her lungs for which she was very amazed and pleased!

### **Thumb—Crushed by 10 pound weight two days earlier**

30 year old female Personal Trainer

Programs: Directly over thumb: Relief, Lymph twice, Capillaries, Cell Regeneration, Ozone, Muscles

After one session she found immediate pain relief. Being a personal trainer she knows her body well and felt that the area healed much quicker and she could return to working out much sooner.

A second benefit, as an asthmatic, she found after the session her lung volume had increased.

### **Ear pain during landing in a plane**

52 year old male golfer

The initial Unwind and Quantum programs **were not** used!

The only program that was used was Ears over the sore ear for four minutes, which completely took the pain away in about two minutes! Amazing!

### **- Anonymous**

I find I have profound relaxation, which gives me relief from the Fibromyalgia symptoms of pain and stiffness.

### **- Mauri D.**

My 4 yr old daughter wakes up in the middle of the night crying with growing pain in her legs. 10 seconds on unwind and she is asleep.

### **- Maria R.**

A friend used laser several times for a couple days had terrific results, helped his feet and hands, he is a diabetic he ended up buying one. He is very happy and feeling much better.

### **- Cecile M.**

My shoulders have become acutely painful. I used the laser by itself and/or UV probe by itself with very good relief of inflammation. I have done this several times since purchasing the laser and probe in Feb/10.

**- Sharon K.**

Had severe headache that I needed a chiropractic treatment. After using the probe headache was gone and I didn't need chiro.

**- Margaret W.**

One day I cut my finger. By the 3<sup>rd</sup> day it was throbbing from an infection. I was aware that Ozone acted as disinfectant so I plug in the Probe into the unit and held it on the cut for about 10 minutes. In about ½ hr the throbbing stopped and next day the cut was almost mended. By day 2 it was totally healed.

**- P. W.**

I have suffered with low back pain for at least ten years on and off. My doctor could only offer drugs or surgery, and neither seemed a workable solution because of the long-term harm to my health. Six months ago, I started using the Quantumwave laser every day at the wellness center where I work. The pain is gone, but so is the stress. The "side effects" of the laser have been improved sleep, feeling of well-being and improved circulation, which sure beats the "side effects" of surgery and drugs offered by the MD's.

**- Joan M.**

My mom had bleeding in her lungs. She was coughing blood for about 2 months. I used the laser on her once and she noticed a shift in the color of the blood, it became lighter. We weren't able to do it again for a week or so but when we did another session it changed more. She bought her own in February. However by this time the coughing of blood was gone! She "loves" her laser.

**- L. S.**

I've had a lump on my arm the size of a quarter for approx. 2 years—just using the laser on it this weekend, it has gone down to the size of a dime.

**- Lori B.**

I went to a staff party for my work and my co-worker had a headache and in the car on the way I put the laser on unwind on the back of her neck. We arrived at the hotel and my co-workers headache was gone.

**- Helen C.**

My daughter has just gotten a belly button ring. She had been having redness and swelling at the site. We used the unwind protocol. Also we used the probe (red) on pleo, as well as rejuvenate to help the area with great results.

**- Tracy M.**

A client came to see me to get some relief on a knee injury. She was off work and wanted to avoid surgery. We did two sessions about one week apart. She had immediate relief. She returned to work after the 2<sup>nd</sup> session. She is now the owner of her own laser with a team.

Also, I fell skating. When my knee hit the ice, I felt my femur bone push my hip right through and move my pelvis. My husband carried me into the chiropractor's office and then into Emergency. I couldn't put any weight on my leg at all. Using the laser enabled me to continue teaching and heal very quickly. I only used crutches for 2 weeks. I went dancing 3 weeks after my original injury. I saw my chiropractor 2 months later just to make sure everything was in alignment. NO PAIN!!

In addition, I have bone disease in all four quadrants of my jaw. I had an ultrasound to show and diagnose the bone disease. The dentist told me I had two options: Surgery to scrape the disease from the bone OR lasers. No brainer. I already knew about the lasers (I am an EFPX practitioner). I went to the next laser gathering last spring and purchased my first laser. At first, every time I put the red probe in my ear and on my jaw or in my mouth, there was a constant pulsing feeling. Now, I no longer have a pulsing sensation when I am working on these areas. I want to get another exam just to see the improvement.

On 12/11/2009 I used a Scalar Wave cold laser for the second time at a StillPoint Seminar. I enjoyed the calm of the Unwind protocol and then asked about bone/joint studies for my often painful knuckles. A person sitting next to me let me use her laser on the arthritis setting as we listened to our speaker. I believe it was only for four minutes on each hand, but I saw with my naked eye an immediate decrease in the size of my swollen knuckles. Since December, I have purchased a Quantumwave laser and use it approximately twice a week on Unwind and Arthritis. I have now have 100% range of motion and am pain free.

**- Holly H.**

I worked with a person last night that had a knee injury. He relaxed beautifully and his pain level was substantially reduced. His mobility was increased! Waiting to hear how he is today.

**- Shirley C.**

I had 4 tests at 2 Regina hospitals (March 4<sup>th</sup> and March 8/10) and was diagnosed with infiltrative carcinoma, an aggressive cancer in the left breast. There was a tumor of 7-10 cm in it. I put myself on an eating program from the book "The Gerson Therapy" by Charlotte Gerson and Morton Walker. Also detoxing with bio cleanse foot bath; eating various vitamins and using Scalar Wave laser on my body. I am steadily healing from

this chronic condition. Renewed health is apparent in 2 ½ weeks of applying this program to my body.

**- Helen N.**

My personal experience with the laser was the relief of pain due to degeneration of a disk in my lower back. Initially, I felt pain and uncomfortable sensation. Today I am relatively pain-free. Thank you Quantumwave Laser.

**- Margaret G.**

My experience is limited to demonstrations in small groups here in Charlotte and once in Columbia. I love unwinding to still point. I used the laser in Columbia on quantum setting on my shins. I frequently wake up at night because of cramps in my feet and shins. Since then, I have had foot cramps that wake me but no problems with the shins. This weekend, I'm using the laser on my feet!

**- Vicki C.**

Has a bad fall a few weeks ago and reinjured a weak knee. By that afternoon I could barely put any weight on that leg! Spent about six hours lasering the knee using any program that felt right. Significant improvement by the next day with full recovery within a week of an injury that reasonably should have taken 4-6 months to heal. Wow!

**- Bonne B.**

I was saying to my partner that I wished I had a "success" story for a testimonial. As we were heading home I noticed a swelling inside my lower lip, like the beginning of a cold sore. I lasered it all the way home and this morning it is gone!

**- Marg P.**

Both of my thumbs have been in pain for about two years. I put the laser on both for 15 minutes each hand and have had wonderful results. The joints are much better and the range of motion is very noticeable.

**- Dianne T.**

Last fall I slammed my finger in the front door. My nail was deeply dented and the finger was swollen, red and throbbing. That night I heard the instructor talk about the Laser. She told me to use the Quantum and the Blood settings (cellular). Within minutes, my finger stopped throbbing and the swelling decreased.

Our Great Dane got her tail slammed in a door, as she jerked it out-it was bleeding, red and swollen-so I looked in my notes and applied the same technique- within 30 minutes to an hour she was relieved.

**- Hope K.**

In June 2009 my son broke his shoulder blade. He was riding his motorcycle when a car pulled in front of him, and he laid the bike down. I had gotten my laser and probes shortly before the accident, and we used it frequently. When he went back to get the shoulder blade checked, the doctor and his interns were amazed to find the bones had healed.

**- Jan P.**

Knee pain is relieved in 8 minutes-even with bone on bone.

**- Michelle S.**

My husband complained about his shoulder and arm pain. He was unable to raise his hand over his head. After using Unwind and Relieve for about 30-40 minutes, the pain was gone and he could move his shoulder and arm. He became a believer that day in the awesome power of the Quantumwave Laser.

**- Shirley R.**

My experience with the Quantumwave Laser has been absolutely amazing!! I was introduced to the laser by a friend of mine who, at my request, began using it on my clients.

One of my clients is an exercise instructor and teaches classes where she does lunges. She injured her knee and had been diagnosed with a torn meniscus. After her session, she stood up and was so surprised that she no longer had any knee pain. She immediately started doing lunges and said "Oh my gosh! I can do my lunges."

Many times the laser is not put on the site of pain but on the organ whose meridian is affected. People are amazed they get relief when you put the laser somewhere other than where the pain is.

We have had such wonderful results with the use of the laser it almost seems impossible.

**- Debra S.**

For years I have been suffering from chronic knee pain. In 4 minutes using the scalar wave laser and violet probe, my pain was gone.

**- Bob S.**

In late June of 2009, I suffered a severe sprain of my left ankle and was told to expect to spend the next six weeks wearing the heavy, chunky boot to support the ankle. Beginning the next day, I placed the laser on the ankle (over the top of the boot at work). In two days, I could walk short distances without the boot. In three weeks, I no longer needed the boot at all, even walking on uneven surfaces. There has never been any residual discomfort in the ankle and it is as strong as it ever was!

**- Jeane G.**

I came to my 1<sup>st</sup> demonstration of the laser with back pain neck pain and knee pain. After a few minutes of treatment, they were all gone. I had energy, a sense of balance and wellbeing!

**- Jenny R.**

As I left work one day, my right shoulder began hurting and by the time I arrived home, I could not open a door.

I immediately started with Unwind protocol then used the hand unit and red probe on the shoulder area with quantum, pleo, relieve, and whatever my intuition told me to use.

The next morning the pain was about 90% gone and my range of movement was restored within 24 hours.

**- Kathy B.**

My son cut his thumb quite badly across the top and very deep. We started lasering with Unwind/Quantum, Pleo and Relieve.

I worked with him every other day for a week. The thumb has healed and become flexible again. The cold weather has some effect on it right now but that's to be expected. With continued use, it is getting better every day.

**- Robert G.**

Bought the laser because of pain. Mostly shoulder and neck pain, which would result in headaches and sometimes throbbing and numb arm. Since buying the laser I don't go to the massage therapist or chiropractor nearly as often. My shoulder pain is gone and I have a lot fewer headaches. Hopefully I just keep getting better!!

**- Nadine F.**

I love my laser. I have a lot of lung problems from coughing which can eventually involve coughing up blood. I have used the laser on Unwind, Quantum and all the lung protocols over the last four weeks, and have had a bill of clean health at my last checkup with my specialist. I am happy and very excited about the laser.

**- Gisele C.**

About a month ago, I fell and injured my right arm/elbow. I dislocated my elbow and have a really black/blue bruise. My first reaction was to put ice on the area to help decrease the swelling. That hurt so I tried my laser. I put it in the area with the most swelling. In about four minutes, the pain started to subside. In ten minutes, the pain was completely gone.

I programmed the laser next for Bruise and used it for almost eight minutes; the bruise disappeared! There was a very slight yellowing of the area. But the black and blue bruising was gone. The next morning when I tried to bend my arm, the muscle in the

arm was relaxed, and the elbow slid back into place on its own. I am so thankful for my laser!

**- Vertha P.**

I've been plagued with chronic upper back pain and tailbone problems. These stemmed from several falls, one of which was a high school incident. Throughout my adult years, I've needed to get chiropractic treatments to release the vertebrae in my upper back.

Since acquiring my laser and using it in the cranial and sacrum areas, I'm finding that the tension and stress release I've experienced when using the Sacrum protocol feel great! I also use the laser set on Quantum and Neuro Muscular for shoulder to neck areas and around the shoulder blades. My head can turn easily from side to side with ease now. My laser has actually saved me trip to a specialist clinic far away.

**Ann V.**

My experience with the Quantumwave Laser has been absolutely amazing!! I was introduced to the laser by a friend of mine who, at my request, began using it on my clients.

One of my clients suffers with Parkinson's disease and has a fused lower back. With all the exaggerated movements due to the disease and the fusion, she has a lot of pain in the lower back.

At her first session, she was moving so significantly she could not sit still and kept sliding off the chair. By the time we got halfway through the session, she had completely stopped shaking and moving. Her back pain was much better and she was able to pick up her feet when she walked instead of shuffling her feet.

The pain in her back came back after several days but remained better after the 3<sup>rd</sup> session for several weeks. Just imagine how great she would feel if she had her own laser!!

**- Debra S.**

The very first day I received my laser, I happened to be visiting with a friend of mine who had broken his arm and sprained his wrist. He had his arm suspended and he had been taking medications for pain for over a month. He still had inflammation and the healing process was very slow. I tried a few settings on his arm & within about eight minutes, he felt such relief from the pain that he didn't need to take his medications for a few days. He now keeps begging me to use the laser for all sorts of problems

**- Meredith R.**

I had surgery for a ruptured appendix in 2007, which left me with a thick scar. I used the laser on the scar and no longer have the thick band of scarring and the incision mark has faded considerably.

**- Judy T.**

Four minutes on each side of my lower stomach and menstrual cramps are gone!

**- Maria R.**

My metatarsal arch had "fallen" and was painful. I had a 10 minute treatments and although I didn't notice anything right away the next morning my foot was pain free for the first time in 2 weeks.

**- Polly S.**

My neighbor had such sharp pains in his shoulder that it would wake him up in the middle of the night. I used the laser and probe on him a few times, and he couldn't believe the difference. He no longer wakes up in pain and he is no longer on pain killers. Since he experienced such great success with his shoulder pain, he wanted to try the non-smoking protocol and is currently smoking 40% less than before we started. He is sold on these lasers!

**- Bonnie P.**

I had a sinus infection. My eyes were swollen; I had lumps under my eyes and beside my nose. I was not pretty.

I started using the laser on the PLEO setting on the tip of my nose for about 20 min. I also used it on my forehead and under my eyes. The next day I was back to normal.

**- Helen P.**

I offered to loan the laser to a workshop attendee, who had been in a car accident several years ago and had little use of her right shoulder. I showed her how to turn it on and left her with it for the day. The next day, the mobility in her shoulder was GREATLY improved.

**- Bonnie B.**

Two weeks after I bought the laser I tore the meniscus in my knee and was in extreme pain and could not bend or put pressure on my knee.

I used the laser on my knee every day on the Unwind protocol. I also used Ligament, Muscle, Relieve, Soothe, Endorphins, and the Spleen meridian. Within four days, my knee felt 85% better, and in one week, 90% better!

After two weeks, the pain was 99% gone, and no longer required pain medication or surgery.

I was amazed! Wow!

**- Jane S.**

My wife had her right eardrum "sucked out" in a medical procedure over 40 years ago leaving her deaf in her right ear. The first time I used the laser on her, I did the basic procedure of cleaning her adrenals. Last night she shot up in bed, and I thought nothing of it. This morning she tells me that last night she was lying on her good ear and was woken up by the sound of our dog cleaning her paws. She heard all of this with her "deaf" right ear. We checked her hearing again by covering her left ear while I went into another room and spoke to her in a normal tone of voice and she heard me with her right ear.

**- Michael R.**

A groin muscle injury, a result of a fall. Doctors didn't know what to do as I did not respond to their treatment, so I was sent to physical therapy. I went home, did the Unwind protocol for 12 minutes, then used the Cellular and Muscle protocols. After one session it was gone. No pain and complete flexibility!

**- Marcia S.**

I have been going to doctor for a year and being treated for high white blood cells. We all thought I had leukemia. After six sessions with the laser I now have a normal thyroid and normal white blood cells.

**- Jennifer G.**

I was in a car accident in 2002 and experienced whiplash. Every muscle on the left side of my head from the ear through the shoulder was torn and damaged. Because of this accident, I developed chronic pain in my neck and shoulder. After using the laser, I no longer have pain even if I've been at the computer for an hour or two.

**- Barb F.**

I am an acupuncture physician and I use my laser with the red probe daily on my patients, family and myself. I have found it very useful for pain issues because I specialize in sports medicine. Acupuncture has been around for thousands of years but the Quantumwave Laser has brought my acupuncture practice into the 21<sup>st</sup> century.

**- Joan M.**

One of my previous polio patients who is 85 years of age has a weak leg which gives him ongoing problems. He exercises on his stair stepper daily, and the maximum amount of steps he was able to do were 15. After one laser session, he was able to increase his reps to 33. After another week of sessions he increased his reps to 55.

**- Richard L.**

During the 2010 winter storm in Regina, I pushed a car out of the snow drift. I heard something pop in my back and was in severe pain. I used the laser continuously for

about four days and suddenly, I realized my back was pain free. I've had no problems since.

**- Barbara C.**

I injured my lower back in May 2008, and as a result, back and muscle pain kept me from doing many day-to-day activities. I was advised by my doctor to take painkillers, and visited the chiropractor every two weeks with only minimal pain relief. In February of this year, a dear friend purchased a Quantumwave laser and I used the basic Unwind protocol on me. I have been pain free ever since.

**- Janet W.**

I accidentally burned my right middle finger and also my ring finger tip. I immediately used an ice water bath for my fingers followed by more ice.

I also turned on my Quantumwave Laser to "Relieve" and kept repeating....but blisters began to form. After about one hour of this, the blisters all but disappeared. I didn't need any more first aid. I'm sure the QW Laser saved the situation.

**- Rosalyn H.**

I consider my experience with the laser a miraculous one. For decades I suffered with chronic neck and shoulder pain despite chiropractic, cranio-sacral therapy, reiki, reflexology, etc. I would get relief for a few hours after a treatment but it would always return like the weight of the world sat on my shoulders. With just one laser session the pain was gone and it never returned. I felt "lighter" and life was definitely good for the first time in years!

My daughter (age 19) had a 10cm pancreatic tumor removed last year. She lost her spleen and a third of her pancreas. Nine months post-op she developed a debilitating pan syndrome. The physician's answer to this was narcotics. The laser's answer was relief, after just one treatment!

As a nurse, trained in western medicine, this new awareness brings hope and relief to situations where medicine fails or complicates.

Thank you for this wonderful tool!

**- Alice J.**

My neighbor's sister from Calgary fell and dislocated her shoulder and cracked a bone in her arm. She had to be "put under" to put the shoulder back in place. This happened on Thurs Mar. 25. She arrived in Swift Current the next day to attend the Women's World Curling. My neighbor asked me to give her sister a few laser treatments while in town. After the first session she flexed her fingers, opened and closed her hand and moved her whole arm up and down without a lot of pain! She was amazed as she was unable to do that since her injury. She felt less pressure and pain in the whole area and was totally thrilled with the result after just one treatment. I gave her a total of four before coming to Regina for this seminar. She can't stop talking about it and plans to attend the session in Calgary on April 9<sup>th</sup>. She has a doctor's appointment next week

and can't wait to hear what he has to say re: physio therapy and or rehab that she may have to undergo. She believes if she could continue with the laser she may not need treatment all.

**- Bonnie P.**

Last Wednesday I "tweaked" my hamstring playing softball. I promptly started using the laser when I got home. Within 24 hours I was 90% pain free and focused on playing 2 games next Wednesday. The laser lessened the sever pain and accelerated the healing...a great tool for rapid recovery!

**- Brad Y.**

Relief from lower back pain caused by degenerative discs. The nerve system setting (subroutine Organ Systems) is the preprogrammed setting that worked for me. I set the laser for 15 minutes and applied to one sore spot at a time.

**- Frank J.**

## DENTAL TESTIMONIALS

I was diagnosed with Fibroma next to tooth #14. The Fibroma had to be removed and sent to a lab for a biopsy. The fee I would have incurred would have been \$1,000.00. I also would have needed a periodontal "supragigival" costing and additional \$110.00. This entire procedure would have entailed approximately five hours and six visits to the dentist.

When the doctor mentioned that he would "Laser" the Fibroma out, I thought I would give my laser a try. I used it on a periodontal setting and the Unwind setting during the course of two weeks prior to my next appointment. The Fibroma disappeared.

When I cancelled my appointment, he was very concerned and sent me a letter relieving him of any obligations if I didn't have the problems attended to properly. When I went back three months later for my regular checkup, he saw that the Fibroma was gone, and the other problem was improved.

I told him what I had done and showed him the laser. I guess he was impressed so I left him some literature.

**- Ann F.**

I decided to have my remaining lower teeth pulled as I only had a few teeth left. I am 82 years old and if I waited much longer, it would be harder on me. The day after I had them pulled, my tongue and throat were so sore I had a hard time talking because of bone fragments from the wisdom tooth left in my gum. The pieces were so sharp that when I tried to talk, they scraped my tongue. The wisdom tooth must have had an abscess in it. The infection caused the lymph gland under my jawbone to swell up and my throat to hurt.

A friend said she had something she thought would take care of the problem so I met her and she had me hold the Quantumwave laser on my jaw for a few minutes. Within just a few moments, the swelling went from walnut size to pea size.

The dentist had told me that my system would absorb the bone fragments in a few months, so what happened next was a surprise! We came home about an hour later and I felt a piece of something hard in my mouth, so I went to a mirror only to see it was the larger bone fragment from the wisdom tooth. A little while later the OTHER bone fragment came out also. In a DAY the whole thing was no longer a problem, and the pain was gone! The dentist was extremely surprised at the incredibly fast improvement!

**H.B.**

I have mercury toxicity due to amalgam fillings. In detoxing my cystic duct my liver and gallbladder would get stopped up. My chiropractor used the laser to unwind my cystic duct and open up the gallbladder to produce the bile necessary to carry the mercury.

Adrenals and lack of sleep are problems with mercury. The laser is essential to my recovery.

**- Zan R.**

Listening to Paul this morning re-enforced my experience with an abscessed eye tooth, which was part of a bridge.

Although I had discomfort, I really didn't have a lot of pain; however, I developed a pea-size spot beside my nose and above my eye tooth. The dentist suggested a root canal. At this same time, I heard about the laser and bought one, which I used for a number of weeks.

The dentist convinced me to have the root canal even though my gut feeling was to not go through with it. The dentist cleaned out the root but couldn't do anything about the lump, as it wouldn't freeze. I regretted having the root canal, and continued using the laser until the lump finally disappeared.

**- Phyllis K.**

In Dec. 2008 I had an amalgam filling replaced with a composite. The tooth was extremely sensitive to temperature and began to throb. I took some strong pain killers, but mostly I used the Quantumwave laser and it would alleviate some of the pain.

My work colleagues were convinced I needed a root canal but I persisted with the laser. The pain became more intermittent and after six months, my tooth was no longer sensitive anymore.

I am a dental therapist hygienist and very glad that I did not act on my friends' urging to have a root canal.

I have other Quantumwave laser successes but the tooth was the most dramatic.

**- Judy D.**

I had the laser about a month, when I developed a major infection/abscess in the right lower jaw/teeth area.

I was scheduled for a root canal and antibiotic regimen, but used the Quantumwave laser on the outside of my mouth/cheek area directly over the infection. I used PLEO three times per day for a ½ hour. After three days the abscess was gone! NO surgery, meds or root canal! This was six months ago!

**- Sally J.**

I had amalgams replaced just before Christmas 2008. The trauma was too much and I wound up with a severely sensitive molar that was aching and ready to blow up. I kept using my laser and red probe and it subsided. This kept happening for about six months.

Everyone was sure I needed a root canal but I persisted with the laser. I still have my molar and all is well.

**- Juay T.**

I had a very painful infection in my gum. I used the laser on the area, and within 12 hours the pain was 90% decreased, and completely gone within a few days.

**- Joy C.**

A friend of mine had a crowned tooth that kept getting infected. I used the red probe on Pleo and Ozone and worked on it for about ½ hr. I then used focused on the organ that corresponded with my tooth, and used Unwind and Quantum. My friend has no problems with the tooth any longer.

**- Connie A.**

## MISCELLANEOUS TESTIMONIALS

My daughter, Taylor, had a blockage on her right sinus in her nose which made it impossible to breath out of that nostril well. I worked on it for two weeks and the dentist took another x-ray and it was gone. The dentist was amazed. I held unwind over it with the main unit for 8 minutes, then I ran unity for 4 minutes every night for 2 weeks. She is breathing fine and the blockage is totally gone.

**- Lisa T.P.**

I was about to throw out a vase of 8 day old roses. They were sagging, unsightly shell of their original beauty. Instead, I decided to see what my new laser could do for the flowers. I used the laser and ran four 4-minute sessions with the Quantum setting. After 3 hours, the flowers were restored. The energy from that 16-minute session gave them enough life to last an extra 3 days before the leaves started falling off.

**- Patrica R**

Did a PH test of tap water and it was at 8.5 lasered it for 4 minutes PH was at 6.7.

**- Helen C.**

I have worked in the complimentary health field for many years, and have worked with many wonderful modalities.

The second time I used the laser I noticed I went immediate into belly breathing. This fascinated me as all these years, I have never experienced something that got me into a relaxation mode so quickly.

I have also had excellent results with sleep.

**- Enid O.**

On April 1, 2010 I received my first Quantum Scalar Laser treatment. The very next day two of my good friends, couldn't get over the changes they saw in me. They told me I was acting differently; moving more elegantly, holding my body straighter. I smiled knowingly and told them about the Laser treatment and how great I was feeling. I then started weekly treatments, and in June I rented one for a week, and by July 2<sup>nd</sup> I had my own.

The biggest benefits for me was my body started to shrink, my eating habits improved and my wrinkles started to fade more and more. I would lie in bed and feel my legs getting longer and feeling thinner. I would look in the mirror and see my wrinkles fading and the shape of my face thinning. My clothes started to fall off my shoulders. I was shrinking before my very eyes. I actually ate about the same; I just noticed my choices were healthier and smaller in portion. I also have much more energy, stamina and passion in everything I do. I feel wonderful and" I just love my laser".

The Protocols I used the most were unwinding, quantum, vital, coherence, unity, toxins rejuv, and liver.

**- Gail P.**

I worked on a client using essential oils and the laser. She had one hip replaced one year ago and 2nd hip two years ago.

I used unwind protocol; Quantum and Pleo on tailbone; all the Meridians plus expand and miracles. In one week all her staple marks and scars were totally gone. Her skin was smooth.

**- Anne R.**

My daughter had to get 4 root canals just before her 2 year old birthday, because she had gull stones and kidney stones when she was 6 months old from medication they had give her in NICU when she was born at 28 weeks. Anyway, the medication they gave her had flavoring in it which rotted her teeth out before they broke through the skin. A few days ago she was complaining something was wrong in her mouth. I took her to her dentist and I was told she has pockets of infection on top of the teeth. We decided to give the laser a go, before taking antibiotics. Anyway, it isn't completely healed yet, but it isn't bothering her one bit now. I have been using the violet probe on unwind every night for 8 minutes.

**- Lisa T.P.**

My first visit to a gathering was very de-stressing. I had neck and shoulder tension when I went in and was floating without tension when I left.

I then stopped and had a free 10 minute massage at a health food store. The massage therapist confirmed to me the way I was feeling when she said, "I could not find any stressed muscles, you are completely balanced. I have never had a client like you."

**- Jerry B.**

I first encountered the Quantumwave Laser at a friend's party, November 2009! I jumped at the opportunity to test it for about 80 minutes. I focused on the inflammation of my left hand's index finger's swollen joints. And to my amazement, the actual lump on the fore joint, diminished. I am NOW in the process of training and becoming a proud Quantum Laser owner!!!!

Thank you so much for this extraordinary tool!!!

**- Sylvia L.**

The biggest difference I noticed since using the laser is the feeling of peacefulness. I am a "go-go" person who never relaxed and always lived in a state of tension. Surprisingly, I still accomplished everything I wanted to do in a less tense way.

**- Doreen W.**

The physical benefits of using the scalar wave device have been dramatic. We have experienced a great reduction in stress and pain, and have relief, mind clarity and improved deep restful sleep. It feels as if the body is constantly saying "Yes! Give me more!"

Curiously enough without fully understanding the "StillPoint" state, my husband and I felt as if time had slowed down and we were getting more done with less pressure! It is almost as if we are living in a new dimension of where we are supposed to be, but somehow got sidetracked along the way.

Thank you Quantumwave!!

**- Selina M.**

My husband snored so badly that we could hear him downstairs of our home. He started using the laser on Unwind and Quantum every night. After three nights, he no longer has a snoring problem.

Today I experienced "TOTAL STILLPOINT." I never thought that I could "ever" achieve this state.

Very Excited!

**- Beverly M.**

I had my gallbladder removed six months ago but still used the Gall Bladder setting. It brings emotional release. I could let the grief go!

**- Angela P.**

From the very first time using the laser I have not chewed or bitten my nails. They are growing for the first time in 10 years or so. My cuticles have not cracked since either, hence, no hangnails.

**- Brenda B.**

After a personal crisis I collapsed in August 2008 with adrenal exhaustion followed by sudden onset of menopause. With my endocrine system failing I worked with many good tools which kept me off pharmaceuticals. I continued on a down spiral into depression, extreme anxiety and agoraphobia.

My sister visited in December 2008 and gave me 2 or 3 sessions with the Quantumwave Laser. She reports that she saw me shift and in looking back I realize that this was the turning point in climbing up out of that black hole.

I purchased my own laser in November 2009 following the Western Canadian launch and have been experiencing the benefits of daily unwinding and rebuilding to the point that now, In February 2009 I have enough energy and confidence to work at my part-time job and begin resurrecting my own business.

**- Karen F.**

As a “beginner” with scalar lasers, I attended my first seminar in Saskatoon, SK in January. Ratansi did a great informational session which included his most recent work using laser therapy in his clinic in Coquitlam, B.C.

By the first half of the session I was hooked! I was hooked on learning more about use of this “gadget” to possibly help me in my journey to better health and wellness.

Having been diagnosed with systemic lupus erythametosis about 10 years ago, losing my professional career, and salary, having to go on disability with all the attending daily challenges; I welcomed a chance to learn about an opportunity to have a better life.

Dr. Ratansi described and showed very recent research results that were very impressive.

During the course of the session, I had the opportunity to handle and use a laser and followed the “unwind” directions. A lady sitting next to me coached me a little on how to “get started.” At break time, I asked Dr. Ratansi about a quick protocol for lupus, my condition. He gave me the directions, I followed them and over the course of the last ¾ hour of the presentation, I “fiddle diddled” with the laser, placing it on my spine, a lifelong problem area.

Then I decided to try the next challenge, two fibroids on either side of the neck. Additionally I had been going to different sites that posed some problems, ankles (old fractures), tailbone (old fracture) and shoulder (aggravated). By the time I left for home after the presentation, I was quite relaxed and had a happy feeling.

That night I slept “like a baby” for 7 hours (my usual sleep is 5 ½-6 hours); waking in the morning more refreshed than I have been in years. PLUS upon checking my fibroids, I found them to have shrunk by HALF-unbelievable!!

By the way, my 37 year old son decided to stop smoking. His colleagues suggested that he investigate and give laser therapy a try. He did get it and has had success with stopping smoking, something he had not been able to do on his own for over 15 yrs.

That was the impetus for me to really consider scalar laser therapy for myself and possibly other family member. A close friend also encouraged me to find out about scalar lasers.

Love the laser!!

**- Ann V.**

I work in a very toxic workplace. My first experience with the scalar wave laser was to do the unwinding and then the serotonin on my ears. It took care of my anxiety and quelled my thoughts - a whole new peace-filled happy place that I want to stay in!

**- Anne S.**

My name is Anna C. and I am 14 years old. When I was 5 years old, about, I fell straight on my nose. Now, as I am getting older, my nose has been growing crooked. After one treatment of “unwind” I felt something throughout my nose tense up and release. Now it is a full straight nose.

**- Anna C.**

I had a client who came to your event due to high stress (not sleeping, tense, headaches, stiff neck, and back pain). Unbeknownst to me, due to EMOTIONAL stress and "replaying her favorite movie, poor me". Thus attracting more negative "poor me" stuff.

After unwinding her and unwinding her pain areas and using Quantum and Unity she had a batch of tears then positively glowed.

Now she has yet to "retake" any sleeping aides, pain medication and she laughs (so her son says).

I worked on a young man who stutters. I did the Unwind protocol and then really worked on his jaw and temples. I also focused on relaxing his occipital lobe.

Wonderfully, his mother noticed his smooth speech and was awed. He still has the odd stutter but he is so pumped, he wants a laser!

I worked on a man who had been off work for the last 3 weeks. He couldn't stand up or move his head as "nausea" "head spins" would set in. He had lost 30 pounds and was pale.

In one session I unwound him. It took a few to get his breathing on the adrenals. Then I worked on his tail bone a lot and rest of "Unwind." We then focused on his ear using the violet probe.

He is no longer dizzy. Instantly, by the end of session his ear ringing stopped. He is back to work and has a healthy pink glow.

**- Julie T.**

A strange reaction of my body. Increased pressure in my brain. Warm and soothing feeling throughout my body. Heightened sensitivity of smell. I had a great sleep of 5 ½ hours. Feeling great in the morning. Peace and calmness of the mind permeates me in all activities. Feel great. Woohooo!!

**- Mariusa F.**

My neighbor's son freaked on me saying he had a concussion. He said, "Don't talk to me! Don't touch me!" (I had patted him on his back.)

I told him that he was welcome to come over to my place. I would try out the laser on him. He actually came over. I did the Unwind protocol and worked on his neck and head area. He totally relaxed. Fell asleep. When I woke him, his headache was gone! Talked to him the next day and he was still feeling great!

**- Shirley C.**

I came to Florida to be with my mother, which in so many ways is an extremely healing experience. During my visit my mother treated me with the Quantumwave Laser and it

really helped calm myself and it also helped me to balance myself. I am very grateful for the treatment and every day I looked forward to it.

Thank you Quantumwave Laser and Mama.

**A. R.**

Thank you, Paul and Lilly for the QWL. My family has benefitted in so many ways. You already are using three of my testimonials. But today being a new day, I of course have many more to share. My son and I love yoga. We now take our QWL to class and Unwind ourselves and the others in our class. The class now does yoga breathing so audible. The yoga teacher now owns her own laser!

It really increases my physical abilities.

**- Kristy**

On Paul's advice, I have been using the laser frequently for the adrenals. I found that I am more easily relaxed in a situation and am allowing my body to heal.

Thank you for the opportunity to have a tool for my family's health that is so portable and positive.

**- Cathy D.**

I brought my sister Friday night to the session. She did not know about or experienced Scalar before and when Paul said to start with Unwind she held it over her heart. She has been carrying a lot of heartache as a result of a crisis in the family. She put the laser on Unwind and within a short point she was totally in Stillpoint. My sister Cynthia totally felt the Unwind.

**- Cheryl Z.**

I attend the information seminar last night and was given the laser to try. This was my first time and was not sure what to expect.

As the evening wore on I could feel myself relax to the point where I had to close my eyes and put my head down. I was totally relaxed. My sister was sitting beside and saw this. She asked me if I was relaxed. I thought "was she speaking to me? Can't she see I was having a nap?" Then I got up and had some coffee. ..Hoping that would wake me up... I never drink coffee!

I left the room, went home and felt much anxiety leave my body.

I had the best sleep ever. I got up this morning feeling well rested. It was a great experience.

**- Cynthia Z.**

I came last night to hear about your lasers. I used Unwind on my adrenals and temples. When I left I noticed that my eyesight seemed to have improved. I am going to purchase a machine.

**- Jeannie D.**

I came to hear about the Quantum Wave Lasers. I used it during the session and I have so much energy today. I am impressed with this machine after only using it once.

**- Rob B.**

As a lymphatic and colon therapist, I am using it in everybody's session. Doing the Unwind first begins the release for the vacuum cleaning (lymph) and exhaust (colon) systems of the body.

During every colon hydrotherapy session, the laser is moved every four minutes to a different place on the large colon starting with the lower sigmoid.

It has replaced my hand in massaging the colon with light! I have also placed oxygen oil and aroma therapy oils to drive them deeper into the tissue.

Many clients have greatly benefitted from the laser including an 88 year old who has relief from irritable bowel to a 10 year old boy constipated from birth, who now has feeling in his digestive tract and daily elimination. As a breast lymphatic therapist it is softening and melting the fibrotic lumps of my fibrocystic breast problems.

**- Roz F.**

After a few sessions with the Quantumwave Laser, I'm feeling more relaxed and at ease. The situations in life are resolving without getting me upset. I'm acting, not reacting, occupied not pre-occupied. Also my sexual life has been enhanced tremendously.

**- Awilda**

I have experienced a variety of vehicles of energy healing. The first night at the conference I felt a definite shift in my energy towards the positive when I applied the laser to my skin. I could feel my quantum energy and felt completely relaxed which is a definite change for me.

**- Rebecca H.**

My patients are experiencing deeper states of relaxation.

One fellow with prostate issues has an increased urine flow and says the feet neuropathy is 95% gone.

For myself, lower leg pitting edema is gone. My facial skin has apparently thickened and jowls are more firm.

Another patient has quite naturally reduced her use of cigarettes by more than half after only 3 treatments.

**- Richard H.**

I received my laser at the beginning of Oct. 2009. I had been using SCIO for therapy to great effect, but was drawn to the laser.

I am at the beginnings of a heartbreaking divorce with depleted adrenals, and was suffering acute anxiety.

Quite simply, the laser has saved my life. My body has been able to Unwind and give me the peace and self-confidence to make the very difficult decision to leave a destructive marriage and begin anew.

I Unwind 2 times per day and also benefit greatly from Unity, Wave, Rejuv, 5HTP, Stress Relief.

**- Lisa S.**

Our six year old son tends to be quite moody. He holds onto a lot of stress and needs to control everything. Doing the laser on him puts him into a calmer state and the energy changes.

**- Kristy K.**

Had a client who had blood pressure of 135 and after an hour of Unwinding she went home and her blood pressure was at 107.

I was in a health food store and the girl who worked there was negative. The manager asked her to be lasered. I lasered her on the Heart Chakra, Pleo and Quantum. After 15 minutes she was smiling, relaxed and positive and said she felt great!

**- Helen C.**

After I came home with the Quantum Laser, of course my wife thought I was crazy spending a huge chunk of money on a laser system. We started basically with the Unwind protocol but mostly I let her play around with it daily. She noticed her eyes were a bit cloudy and yellow. She was also feeling quite run down. After a week of Unwind and Liver setting over the liver her eyes were completely cleared and the yellow disappeared. She was very impressed. Happy wife, Happy life!

**- Alain W.**

I have been using the laser for 4 months and friends have been remarking that I look slimmer. I weighed myself and I've lost 10 lbs. Not doing anything different except the laser.

**- Maria R.**

After I received and used my laser, I don't worry. I'm calmer, handle situations better, increased self confidence and self esteem. Do more activities "alone" now where before I was very nervous and afraid. Now I look at things as an adventure.

**- Harriet B.**

I have been a massage therapist for over 20 years. Since I added the Scalar Wave Laser to my practice (both as an extra "tool" or as a stand-alone therapy) I have received fabulous feedback from clients.

Great results have been more consistent and without the wear and tear on my body!

**- Lidia L.**

I am thrilled to find a tool for Health Rejuvenation! I am a mother of nine children. All are married and have given me 30 grandchildren and eleven great-grandchildren. I made sure each home has a laser so they can learn how to help their children.

I am simply fascinated with the health benefits of the laser. I made it my gift to them to have a laser in each home so they can learn and do sessions on themselves and their children. Here's the gem. Give a child a fish, he'll eat and die. Teach a child to fish and he'll live to grow old!

Thank you for sharing this knowledge with me.

**- Joyce T.**

Attending last night's session, I applied the laser to my heart. I immediately began to Unwind, color came to my face and my eyes brightened. I relaxed into Stillpoint so quickly and easily. Thank you!

**- Corinne J.**

I used my friend's laser throughout the morning during Paul's presentation. I've noticed the stiffness in my neck/upper back has dissipated; I feel calmer. I had 3 hours sleep last night and don't feel tired ( I expected I would be exhausted).

Overall I feel centered and various aches and pains are gone. My level of alertness is much greater that I would normally be experiencing on such little sleep. My energy level is great now!! My vision is not blurry as it sometimes is. Great Stuff.

**- Marcella G.**

I am so excited and pleased to have finally found relief from daily stress. I overheard a conversation in a restaurant; a man was talking about his wonderful results from having a laser used on his tailbone. I felt compelled to ask him about his experience. This led me to a local lady who owned the laser and was willing to help me have my first experience. I purchased the laser yesterday and am happy to have this useful tool. It will be used daily, it works great!

Thank you!

**- Linda H.**

I first had the Unwind done on me after a hectic day at work. While Sylvia was doing this, she told me about the laser facials she does. I have had 2 of them - I didn't know if I mentioned how de-stressed I look lately.

The Unwind made me a believer and the facials solidified that belief.

Today I bought my own.

**- Cathy L.**

After more than five years of very bad depression and taking five prescriptions (asthma). Now after 2 ½ weeks with my laser, using it twice a day, I feel totally different. Not grumpy anymore, upset or frustrated. I don't take things very personally against me, NOW, very new, feeling happy in a totally new mood, and of course new white blood cells and thyroid working normally since Dec. 29, 2009. Thanks so much for this incredible tool.

**- Jennifer S.**

During August & September, I was adding the finishing touches to my new office building by doing the insulation, painting and moving. I saw massage clients all day and worked on the building until 11pm each night. I used the quantum laser each night and it kept me "glued" together both emotionally and physically.

**- Laurie & Bob B.**

The violet probe is amazing—emotional pain was relieved quickly and the relief stayed.

**- Michelle S.**

My experience with the Quantumwave laser has been absolutely amazing!! I was introduced to the laser by a friend of mine who, at my request, began using it on my clients.

My son is 26 years old and very volatile and destructive. He has punched holes in walls, kicked in a 52" screen TV and was verbally abusive. I got him to have a laser session by telling him it would help his back pain. With him trying to get into the military he said he would try it.

The first session resulted in my friend chasing the pain all over his back leading us to believe it was emotional and not physical. I didn't see him until the next day when I asked him how his back was. He said "For the first time in years, I woke up pain free." This lasted approximately 4 days. After his 2<sup>nd</sup> session a week later, I asked him how he was. He said, "Something weird happened about 11 o'clock last night." When I questioned him about what he meant, he said "I don't know. I just felt happy. Not depressed. I felt lighter!!"

After four sessions approximately a week apart, my husband even noticed a difference. He was calmer, less swearing and instead of instigating confrontations, he would walk

away. Don't get me wrong. He still has the occasional melt-down but they are fewer and far between.

This is just one amazing result I have experienced from the laser. It not only works on the physical, but has wonderful affects on the emotional as well.

**- Debra S.**

I have been using the laser for about five months. I have had fungal moles dry up and fall off my skin. I have had tremendous movement from anger and into forgiveness using it on liver/gallbladder where I no longer have "attacks".

I have experienced a heightened high sense perception that has helped me in my client's sessions. I have used special customized programs for periodontitis and avoided having to have gum tissue perio scaling done.

I have used special customized program for lowering blood sugar and have helped modulate using diabetic prescription meds (in addition to basic unwind)

All this in five months. I have not been able to regularly use it! Imagine if I increased my frequency of use!

Also, people have told me I look younger but I think what they are seeing is that I have less strain of emotional holding on my face.

**- Joy F.**

After 30+ years of practicing Krka Yoga and multiple other processes, the integration of the Quantumwave laser has been quite remarkable! On a deeper level, the speed and efficiency of the conscious shift is unlike any other process I have ever experienced!

**- Cliff J.**

My mother passed away last Friday. She was an extremely active, woman and it took us all by surprise that such a vital person could be so alive one day and gone the next.

As would be expected, it was an extremely difficult time for my family and myself.

I used the laser to calm us, relax, and allow emotion to pass thru us easily to ease our emotional pain.

It's been three days since she was laid to rest, and here I am at this seminar, as I knew my mother would want me to remain active. There was a heaviness and sadness that enveloped my entire being. While the laser helped, I still had this heaviness.

I was given a violet probe to use while I was there and felt like the extreme heaviness had been lifted. I feel better able to cope with loss and can talk about it much more easily now. While I am still sad and raw from the loss, I am so grateful that I am here and could us the violet probe.

Thank you Thank you Thank you

**- Michelle S.**

The Quantumwave Laser: How do I love it? Let me count the ways....

Many of us non-professionals affectionately call it, "Doctor-in-a-box." From the range of what it has accomplished in my own energy body system, this label would seem an appropriate nickname. But the more I use it, the more I am discovering that its applications are much deeper, broader, and expansive than just appearing to deal with the body's ills.

Although my finance at the time, didn't support the wisdom of adding another monthly payment to my budget, I was willing to eat peanut butter sandwiches for a year, to be able to get a Laser. I have never regretted my decision.

One of the miraculous personal experiences I've had with the laser, was in the dentist's office where I had stooped down to stow my purse in the exam room, and when I stood up, I hit my head on the heavy metal tray with sharp corners. The staff came running into the room to find me sitting on the floor protesting I was fine, but I wasn't: I was quickly getting a granddaddy of a headache and felt shaky and dizzy. They discovered I had a deep gash in my head, which was bleeding profusely. The dentist wanted to send me next door to a doctor for stitches, but I said, "No...I don't do doctors so much. I've got my Laser with me. Just put a piece of gauze on the wound and let me sit here a bit." So, reluctantly, they did that, and I held the Laser on the top of my head on different settings until they returned about 5 or 10 minutes later. The bleeding had absolutely stopped. The pain had disappeared, and did not bother me again from that time. No headache, only a slight tenderness at the wound site for a few days. They gave me a prescription for Vicodin, which I refused to fill.

I cannot imagine life without my Laser! If I have an "owie," I hit it with some of my customized settings for pain, healing, and regeneration. If I awake feeling physically draggy, sluggish or depressed, I set the laser to the Serotonin, Endorphins, and Wellbeing settings on the occipital ridge, temple, nasal passage, and below ear areas (anywhere that openings in the skull occur)

If my hip joint is bothering me, I have learned that it's probably my gallbladder meridian and I use that.

If my back hurts, I do "governor" meridian and apply Laser to nerves, neuromuscular, muscles, and bone, around the affected area, in addition to continuing to work with the absolutely FOUNDATIONAL "Unwinding." (I actually do a daily run of a few minutes each on "Unwind, Quantum, and Pleo," on all five of the basic areas: L Adrenal, R Adrenal, Sacrum, Occipital Ridge, and Thymus (just Quantum and pleo on thymus).

If I look in the mirror and don't like what Mother Nature is trying to do to my face over time, I run days of "facial" and feel happier about my appearance after that.

I use "fat cells" and "muscles" on my belly, which wants to stand out.

If I feel like my body is trying to "come down with something" I have so far very successfully headed that off with Immune System" and "Detox" and simply amping-up Laser use for that period in general. This is only a thimble in an ocean of what I use my Laser for.

I know I have only BEGUN to discover what all this Laser can help accomplish in achieving wellness, wholeness, balance, and over all STILLPOINT, in my energetic system; and I am looking forward to years of continued used with greater understanding, as new discoveries about its efficacy and capacities are made! It is

perhaps the most useful tool I have found to help me stay radiant, healthy, and youthful in a world which has become dependent on "Major Medical" and "Big Pharmacy" In the words of another well-known Guru, "The kingdom of heaven is WITHIN you."

**Sydney C.**

Many things have changed for me using your great Quantumwave Laser!

Two years of dealing with painful bleeding and sensitive gums I had tried a lot of alternative things including my Quantum touch group tag teaming me.

I used the red probe after getting my own laser. The next day it was really bad. Then the next day it started improving and feeling good.

My mom is so much better with a lot of issues including walking.

But the most precious thing is the change I feel every second, every breath. A real calmness has come over me. THE FOG IS GONE! MY FOCUS IS BETTER. And I'm able to accomplish so much more. A real sense of direction. And I have that safe feeling like the days when I was Daddy's little girl.

**- Carol H.**

I am very happy to have been introduced to the Quantumwave Laser. This was the most awesome program that I have been introduced to. I love how I feel when I use the laser, and love the energy and a sense of wellness I experience when using it. Thanks a million.

**- Jeanette F.**

I purchased the Quantumwave Laser after using a friend's laser to avoid a root canal using the red and infra red probes.

I received my laser the last week in September 2009. I had severe vertigo at the time, and the doctor diagnosed an ear infection and gave me a prescription for antibiotics. I used the Pleo setting with the red probe for 20 minutes in the navel. After that, I took a 20 minute nap, and woke up symptom free!! I continue to use the laser to unwind.

**Jeri H.**

Like many alternative practitioners, I have gone through several cycles of attracting groups of clients with similar concerns.

Recently, a friend brought her five year old grandson to me, looking for anything natural that could help. He behaved more like a two year old than a five year old. He was very loud and restless, constantly moving in jerky rapid movements with almost no fine motor control, and only about six words in his vocabulary. After only three sessions with the laser, I received an excited phone call from his mother that he sat at a table with paper and crayons. He drew a house and said "house." Both his mother and grandmother were jubilant!

Needless to say—so was I!

**- Elaine H.**

I am a pretty big skeptic, I have spent literally 100's of thousands of dollars on different treatments, processes, courses, workshops, healing, praying, traveling, talking....searching for relief with mental suffering. I came last minute with a friend, who raves about the laser. I am so impressed with Paul and who really walks the talk. I am looking forwards to enjoying more of the benefits of the laser. It's an honor to learn with his likeness.

Thanks and keep up the great work!

**Lori B.**

Prior to having the Quantumwave Laser, I usually spent every winter with a cold, sore throat and ear ache.

The first winter after using the Quantumwave Laser every day this was no longer the case. However, mid winter I awoke early one morning with an ear ache, stuffy head, and major sore throat. I immediately reached for my laser and probes. I used the red probe on Pleo in and behind my ears, down both sides of my throat, and up my nose. Within about fifteen minutes, all pain and stiffness was gone, and I was able to start my day.

**- Elaine H.**

Saved my life. After a very stressful ten months looking after a dying husband from lung cancer, my adrenal glands were very stressed. For years, I have had a severe back pain from a fall on my tail bone. After this injury I was unable to walk for a number of weeks. I crawled like a baby until the inflammation left. This happened 20 years ago. After doing the basic Unwind, Quantum, and Pleo for six months, I was without pain and now can walk and do yoga again. No pain, more energy. Life is now great.

Thank you for a great TOOL.

**- Jeanette S.**

A friend of mine has had severe knee pain for about a year. Physio and several other modalities have had no results.

She and I travelled together this winter so I took my laser along and showed her how to use it. She worked with it for about 15-20 minutes each day. By day three she was sleeping through the night and no longer limping. By the end of the week, the pain was completely gone.

**- Bonnie B.**

After having used the laser just a few times tonight, I can certainly feel the very calming effects. This is the something I've searched for many years with PTSD. It does work for me and if it works for me I know it will work for everyone.

I also used on my lower back pain and shoulder pain. Guess what? No pain this morning. I look forward to years of use with your laser.

**- Phil H.**

We started using the laser four weeks ago in our hair salon doing "facials." I was picked to be the model, 55 years of age and a heavy smoker for many years (quit four years ago). I had plenty of cell tissue damage. After my 2<sup>nd</sup> facial, a few people noticed a change. But after my 3<sup>rd</sup> session everyone noticed, and by my 4<sup>th</sup> session, people were saying, "I want what you have!!" And the rest is history!

My experience from all this is that I am a much more calm and happy person. I feel a sense of inner peace.

**- Bev M.**

No more hot flashes!!

**- Polly S.**

## SLEEP TESTIMONIES

I use the Quantumwave Laser every night before going to sleep. I like to read before sleeping, so I do the Unwind for 20 minutes following the basic protocol. When I am ready to go to sleep, I use the sleep protocol and set it for 20 minutes and then turn the light off. I put it over my temple and I am asleep before the 20 minutes is over. What I observe is a very sound sleep for the next 4-5 hours during which time I dream a lot. The quality of the dreams is much different. They are more intense and more real. For myself, the more I dream, the more rested I feel hence the laser allows me to feel more rested when I get up in the morning.

- **Guy L.**

Three days ago, I had my first treatment at my sister's house. I came to visit and it's been an incredible experience. The first night I slept like a baby. I was in such a deep sleep, when I awoke I couldn't believe it.

- **Marisol L.**

It's always taken me a long time to fall asleep. Now I Unwind before I go to bed, and I fall asleep before finishing the Unwind protocol.

- **Barbara L.**

After Friday evening's session with the laser, I experienced the best night's sleep in a very long time.

- **Lorraine G.**

I have always been a poor sleeper, but after using the laser on Unwind last Friday night I slept like a baby for the first time in a long time. I plan on using the laser for correcting my hiatus hernia and an old whiplash from 30 years ago.

- **Jeanette F.**

The treatment was fantastic. Unwinding was such a treat and the talk was inspiring! I will sleep well tonight

- **Dami E.**

After five nightly sessions, I have been getting best sleep in a VERY LONG time. Not only that, but I have more energy in the morning. I thoroughly enjoyed the weekend.

- **Lorraine G.**

I have trouble sleeping periodically. I find if I put the Quantumwave laser on for a 12 minute setting and put it on my thymus I typically fall asleep before the 12 minutes are up. It works like a charm.

**- Enid O.**

I had my session yesterday, and had a good night's sleep. There was no numbing in my legs and arms and I didn't snore. (my husband was very impressed). I've gotten up early and no anxiety.

**- Bozene F.**

Since using my laser, I have experienced very deep sleeps. A long time coming. Thank you from the bottom of my heart.

**Devona Ager**

I attended your seminar last evening. I used your laser for about 30-45 minutes on my knee. Last night I slept better than I have slept in five months.

**- Leonard E.**

I have been rear ended in five different car accidents, and the last one was at 80km and my neck still hurts. I usually have trouble sleeping because it gets sore at night. I went to a seminar in Regina and used the laser and my neck, started feeling better and was able to get a good nights sleep.

**- Donna A.**

My initial laser application last night to release my adrenals/sympathetics resulted in a very relaxing sleep and no lower back pain.

**- Michael R.**

I just purchased my Quantumwave Laser!

Just yesterday when I came to attend the StillPoint Seminar, I was a little skeptical about the laser. At the seminar I was given a chance to use it on myself. Nothing happened right away. But I slept all night, and when I woke up, I felt no pain. My friends, who have the laser, say that owning the laser is like having a doctor in their home. I believe these words now.

**B.D.**

After using the Unwind program in the evening for a week, I slept seven hours without interruption for the first time in YEARS!

**- Margaret W.**

## ANIMAL TESTIMONIES

Our 11 year old male German Shepherd suffers from hip dysplasia. Programs used over Thymus: Relief, Muscles, Bones, Cell Regeneration, Scar, Ozone.

After the session, the dog could run up the stairs whereas before he couldn't. As well, he could now jump into the back of the owner's truck whereas before he would just look at the hatch as if to say: "Please don't make me jump up there!" One week later the positive laser results continued.

### **Debb B.**

When I purchased this horse off the track, the trainer told me that the lumps were a result of an injury that never healed properly. My vet diagnosed the lumps as a calcified hematoma. I feel it is a combination of saddle trauma and an injury that broke the skin many years ago. I rescued this gelding from the race track, he was still racing at 9.5 years old, which is very old to keep putting all of the pressure of racing on a horse's joints. Many racehorses break down at 3 years old.

The first time I used the laser on Optimal, he liked the light. I started off using Quantum for 4 minutes. I gradually increased the light to the present protocol. I have noticed that the lumps are getting smaller, gradually. I have used the laser on Optimal 5 times. When I used the laser on him last week, he was actually leaning towards the light. Animals are very intuitive. It is important to watch the horse's body language. If Optimal is not ready for the light, and begins moving away, I stop. My goal is to help this wonderful horse enjoy being ridden under saddle. If something hurts, it is not a pleasure. The riding experience must be fun for the horse and the rider.

The lumps are slowly getting smaller and less sensitive.

Protocol used: Quantum 4 min / Unwind 4 min / Unwind 4 min / Relieve 4 min

### **- Reza S.**

I have worked on both of my dogs with the laser. Coco is my girl dog. She is 10 years old and has struggled with immune system issues after having a terrible reaction to a rabies shot. Her eyes were always getting infected and she was always squinting. She had to stay in the collar thing for 6 weeks at a time.

I took her to an eye specialist who told me she would have to be on medication for the rest of her life. We changed some thing in her diet and it helped. She also had to have several teeth removed. A few weeks after the teeth removal, I got the laser. I began running the unwind program for 3 minutes on her belly, then quantum for 4 minutes with the main unit. After two weeks of working on her everyday, she looks great. She is taking no medication. Her eyes are perfect.

I have had the laser since February and I began working on her immediately. So, for approximately 6 months now, she has been in perfect condition. She has energy and runs around like a puppy. Her eyes are perfect now.

### **- Lisa T.P.**

My 9 year old Golden got a massive uterine infection and was near death. The vet said even with surgery there was a good chance she wouldn't survive as the infection was through her body.

Before surgery, I used anti-inflammatory oils and unwind & pleo, pleo, pleo, etc. until it was time for surgery. She wasn't doing very well and he wanted to send her to 24 hour emergency clinic but I talked to him. I would laser her, so he sent me home with her. I used pleo, detox, rejuv, vital, cohere and blood and anti-inflammatory oils all night and at 4am she turned the corner.

We were later on going back to the vets and they called to see if she had died, as most dogs with that amount of [infection] don't survive. They (vet's office) couldn't believe this was the same dog. She was running around happy, wagging tail, eyes were clear.

This was 7 months ago, and everyone thinks she's a 2 or 3 year old golden retriever so not only has she recovered, but she's better than before she got sick.

**- Anne R.**

I worked on my dog - he was in a very scary state - we came home to find him lying on the ground not moving, dry nose, vomit all around his face (very smelly), growling at my son - I immediately put the pleo on his tail for two cycles - then began to Unwind him and Quantum him - he immediately started to improve, get up, walk, drink and his been great ever since.

**- Julia T.**

Our dog, Ziggy, is a white small terrier. He was bitten by a large mastiff dog. His life was in danger until I chased the large dog away. That dog killed our cat.

The laser helped the bite on Ziggy's thigh heal beautifully.

About 2-3 weeks later Ziggy changed from a cheerful happy dog to a scared, worried frightened dog. For 2 or 3 days my wife and I wondered what had happened. I decided to use the laser on Ziggy. He shook with fear at the start of the session with much encouragement and coaxing Ziggy sat in my lap and received his first session. At the end of it he was relaxed and peaceful. He went to sleep after the session.

Next day we had our Ziggy back, happy cheerful and full of piss and vinegar.

**- Dan B.**

I have had the laser since Aug. 2009. I am an energy healer and I am using the laser with my clients.

A simple and very effective protocol I use for constipation with the animal clients is full unwinding plus the frequencies of constipation. These not only solve the constipation but heal the GI system and relax the animal.

I have had many other successes with the laser as well.

**- Marilyn M.**

I have a dog that had warts in his mouth. I used the red probe twice and all the warts are gone and have not returned.

**- Elaine A.**

Maya is a 10 month old Jack-a-Poo doggie. She does NOT miss any experiences with the laser. As soon as the laser is turned on, Maya hears the "Beep" and jumps on the massage table. She curls up on the inside top portion of the legs and snuggles in for the ride. She never moves unless the laser moves or the person moves. She is now a dog who comes to the beep!

**- Meg R.**

Our wintertime visitor, a beautiful orange tabby tomcat, got caught in the front of a moving vehicle tire. The tire stopped turning with the cat skidding ahead for tire of over 20 feet on snowy driveway. Cat could still walk with hind quarters unstable.

**- Lawrence B.**

I used the laser on a 7 month old calf for 3-4 weeks ½-1 hour a day as it was paralyzed and could not get up. He could only move his head. But now he is fit and well and running with the other cattle.

**- Bryn O.**

My cat was diagnosed with a pinched nerve in back. She could not urinate and had trouble jumping or walking. Just not herself — I used the laser on her for a few days she was herself in no time.

**- Mauri D.**

About a week ago, my Dalmatian did not eat breakfast, which is very unusual. She started being very lethargic, barely moved all day and didn't go outside. The next day I took her to the vet. He took blood samples and her temperature. Other than an elevated temp, he couldn't find anything else wrong. She didn't eat or drink all the rest of the day. I finally got the call from the vet at 8:00pm saying she tested positive for Lyme disease. I immediately got the laser did an Unwind, Pleo and Ozone protocols on her. She got right up and went outside came back in and ate. She was 75% better the following morning, and after another session, she's pretty much back to normal.

**- Jim L.**

My horse received a severe eye injury, and it was diagnosed as a deep tear to her cornea. Since Cheyenne, is 44 years old, the vet said it would take months to heal...if it was going to heal at all.

I took a picture of her eye and started working on her daily, long distance, using the laser on her picture.

I put her eye drop medication on the laser to charge it with various frequencies.

After two weeks, the vet confirmed that her eye injury was completely healed!

**- Susan K.**

I have had amazing results with the Quantumwave laser, with clients as well as my dog.

My dog, Cody is part Burmese mountain dog and part cocker spaniel hence the floppy ears. He has issues with his ears and constantly scratches and inflames them. I put the laser on his ear and he actually leaned into the laser. When I put it on the other side he did the same.

He also had done something to his right rear leg and wouldn't get up, yelping when he did. I put the laser on his hip for two 4 minute sessions on Quantum and he was FINE after that.

Love my laser!

**Debra S.**

As a traditional naturopathic doctor, I have complete confidence using my QuantumWave laser on not only my clients and family, but my pets as well. When I noticed that my 4 year old English Cocker was refusing to go outdoors during the day, and that her eyelids were fluttering in an uncharacteristic manner, I took her to our veterinarian.

He diagnosed anterior uveitis, which is an inflammatory condition of the eye causing extreme light sensitivity. There are a number of causes for this condition, but after \$600 worth of blood testing, we still did not have an answer. By process of elimination, the best thought was that an immune dysfunction had created the iris inflammation. The initial non-steroidal drops from the Vet helped with her pain, but she still feared the sunlight. I immediately started using Quantum on her thymus gland to regulate the immune dysfunction.

Animals are quick to respond, and twice daily at 4 minutes per session seemed sufficient. 'Winnie' enjoyed her laser time immensely. Our follow-up trip to the veterinarian at the end of one week showed all inflammation had subsided and her eyes looked completely normal. The veterinarian said he did not expect such a quick response.

I feel confident that our laser therapy was the right protocol to get to the bottom of causation rather than just temporarily relieving inflammation. 'Winnie' now goes out of doors into the sunlight with enjoyment.

**- Gael R. ND**
